## SPECIFICATIONS

### System

Format  
VHS NTSC standard  
Video recording system  
Rotary head helical scanning FM system  
Video heads  
Double azimuth four heads  
Video signal  
NTSC color, EIA standards  
Tape speed  
SP: 33.35 mm/s (1 3/8 inches/s)  
EP: 11.11 mm/s (7/16 inches/s)  
LP: 16.67 mm/s (11/16 inches/s),  
playback only  
Maximum recording/playback time  
8 hrs. in EP mode (with T-160 tape)  
Fast-forward and rewind time  
Approx. 3 min. (with T-120 tape)

### Tuner section

Channel coverage  
VHF 2 to 13  
UHF 14 to 69  
CATV A-8 to A-1, A to W, W+1 to W+84  
Antenna  
75-ohm antenna terminal for VHF/UHF

### Inputs and outputs

LINE-1 IN and LINE-2 IN  
VIDEO IN, phono jack (1 each)  
Input signal: 1 Vp-p, 75 ohms, unbalanced,  
sync negative  
AUDIO IN, phono jacks (2 each)  
Input level: 327 mVrms  
Input impedance: more than 47 kilohms  
LINE OUT  
VIDEO OUT, phono jack (1)  
Output signal: 1 Vp-p, 75 ohms, unbalanced,  
sync negative  
AUDIO OUT, phono jacks (2)  
Standard output: 327 mVrms  
Load impedance: 47 kilohms  
Output impedance: less than 10 kilohms  
CABLE BOX CONTROL (CONTROLS OUT)  
(688HF)  
Stereo mini jack (plug in power) (1)

### Timer section

Clock  
Quartz locked  
Timer indication  
12-hour cycle  
Timer setting  
8 programs per month (max.)  
Power back-up  
Built-in self-charging capacitor  
Back-up duration: up to 1 hour at a time

### General

Power requirements  
120 V AC, 60 Hz  
Power consumption  
L47/L48/L57/L58/X50: 18W  
L67HF/L68HF/L77HF/L78HF/X60HF: 19W  
478: 23W  
677HF/678HF/688HF: 24W  
Operating temperature  
5°C to 40°C (41°F to 104°F)  
Storage temperature  
-20°C to 60°C (-4°F to 140°F)  
Dimensions  
Approx. 355 x 96 x 285 mm (w/h/d)  
(Approx. 14 x 3 3/4 x 11 1/4 inches) including  
projecting parts and controls  
Mass  
Approx. 3.7 kg (8 lb 3 oz)

### Supplied accessories

Remote commander (1)  
Size AA (R6) batteries (2)  
75-ohm coaxial cable with F-type connectors (1)  
Audio/video cable (3 phono to 3 phono) (1)

Design and specifications are subject to change  
without notice.

### SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK  OR DOTTED LINE WITH MARK  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

### ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE  SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPÉMENTS PUBLIÉS PAR SONY.

## SAFETY CHECK-OUT

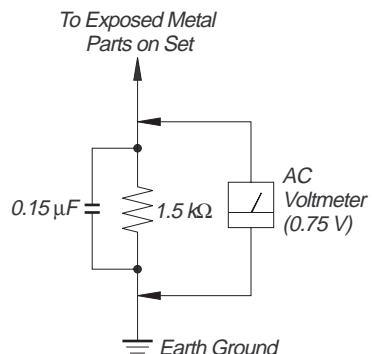

After correcting the original service problem, perform the following safety checks before releasing the set to the customer.

1. Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
3. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
4. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
5. Check the line cord for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
6. Check the B+ voltage to see it is at the values specified.
7. Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

### LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA TW-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75V, so analog meters must have an accurate low voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

*Fig. A. Using an AC voltmeter to check AC leakage.*

## **SERVICE NOTE**

### **1. ERROR CODE INDICATION**

- Error codes are indicated using the lower 5 digits in the fluorescent display tube.  
“At this time, Colon “:” between character is not indicated.”

#### **ERROR CODE**

0	No error
1	Cam encoder error Loading direction
2	Cam encoder error Unloading direction
3	T reel error
4	S reel error
5	Capstan error
6	Drum error
7	Error on initializing
8	Cassette loading error
9	Reserve

#### **MODE CODE**

0	Power-on eject	10	FWD x1	20	REW play
1	Power-on initial	11	FWD x2	21	Cas. loading
2	Power-off eject	12	CUE	22	Tape loading
3	Power-off stop	13	PB-pause	23	Power-off loading
4	FF	14	RVS-pause	24	Mecha. error (Power on)
5	REW	15	RVS x1	25	Power-on eject initial
6	REC	16	RVS x2	26	Power-off eject initial
7	REC- pause	17	REV	27	APC REC
8	Power-on stop	18	Power-off initial	28	Cas. loading (No auto PB check)
9	PB	19	Mecha. error (Power off)		

## 2. HOW TO REPLACE A ROTARY UPPER DRUM (HiFi MODEL)

See below for note.

### 2-1. HOW TO REMOVE A ROTARY UPPER DRUM

- 1) Remove screw ① (+P3 × 8) and remove the ground shaft assembly ②. (Refer to Fig. 4.)
- 2) Remove soldering which is marked by arrow and remove the rotary upper drum board completely.
- 3) Remove two screws ③ (PSW3 × 8) and remove the rotary upper drum in the direction of ④. (Refer to Fig. 5.)  
If removal is difficult, remove it while rotating it slowly.

**Note:** If removal is difficult, check again if soldering is removed completely.

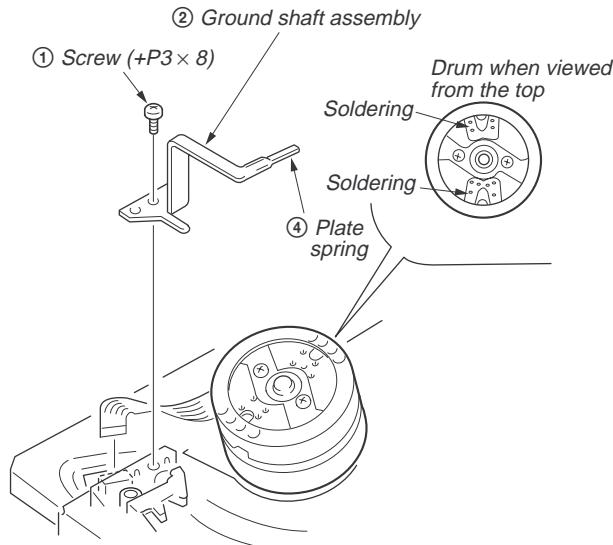

Fig. 4

### 2-2. HOW TO ATTACH A NEW ROTARY UPPER DRUM

- 1) Pay attention so that finger print or like must not be put when inserting a new upper drum into lower drum.
- 2) Align mark of the rotary upper drum board with the mark of the rotary transformer board so that the screw hole on the upper drum and that on the lower drum are aligned. (Refer to Fig. 5.)
- 3) If attaching is difficult, attach a upper drum while rotating it slowly.

**Note:** Pay attention not to damage the video heads.  
Confirm that the upper drum is inserted completely.

- 4) Tighten the two screws ③ (PSW3 × 8). (Refer to Fig. 5.)
- 5) Fix the earth shaft ② by tightening the screw ① (+P3 × 8) so that protrusion at the tip of the earth shaft contacts the center of the drum shaft.

**Note:** When attaching the ground shaft assembly ②, never give force to the plate spring ④.

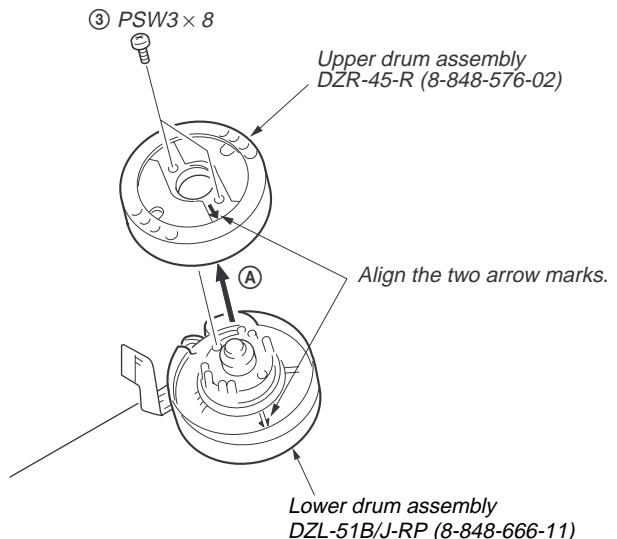

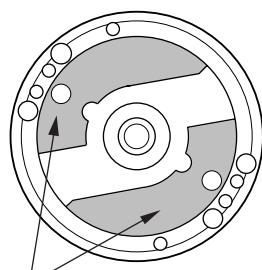

Fig. 5

**NOTE :** There are two types of drum assembly built in the HiFi models.

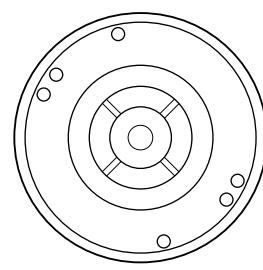

#### [Discrimination]

**UPPER DRUM ASSEMBLY**

*There is no printed circuit board.*

**Note:** It cannot be divided to two parts, the upper and the lower drum assemblies.

## SECTION 1 GENERAL

This section is extracted from  
SLV-688HF instruction manual.

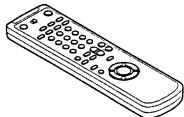

### Getting Started

#### Step 1

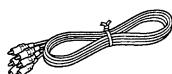

##### Unpacking

Check that you have received the following items with the VCR:

- Remote commander

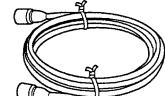

- Audio/video cable (3-phono to 3-phono)

- Size AA (R6) batteries

- 75-ohm coaxial cable with F-type connectors

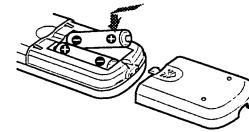

Getting Started

#### Step 2

##### Setting up the remote commander

###### Inserting the batteries

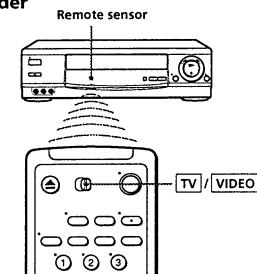

Insert two size AA (R6) batteries by matching the + and - on the batteries to the diagram inside the battery compartment.

Insert the negative (-) end first, then push in and down until the positive (+) end clicks into position.

###### Using the remote commander

You can use this remote commander to operate this VCR and a Sony TV. Buttons on the remote commander marked with a dot (\*) can be used to operate your Sony TV.

To operate Set [TV/VIDEO] to

the VCR [VIDEO] and point at the remote sensor on the VCR

a Sony TV [TV] and point at the remote sensor on the TV

###### Notes

- With normal use, the batteries should last about three to six months.
- If you do not use the remote commander for an extended period of time, remove the batteries to avoid possible damage from battery leakage.
- Do not use a new battery with an old one.
- Do not use different types of batteries.

continued

#### Step 2: Setting up the remote commander (continued)

##### Controlling other TVs with the remote commander

The remote commander is preprogrammed to control non-Sony TVs. If your TV is listed in the table below, set the appropriate manufacturer's code number.

- 1 Set [TV/VIDEO] at the top of the remote commander to [TV].
- 2 Hold POWER down, and enter your TV's code number(s) using the number buttons. Then release POWER.

Now you can use the POWER, VOL +/-, CH +/- and TV/VIDEO buttons to control your TV. You can also use the buttons marked with a dot (\*) to control a Sony TV. To control the VCR, reset [TV/VIDEO] to [VIDEO].

##### Code numbers of controllable TVs

If more than one code number is listed, try entering them one at a time until you find the one that works with your TV.

Manufacturer	Code number	Manufacturer	Code number	Manufacturer	Code number
Sony	01	JVC	09	RCA	04,10
Akai	04	KMC	03	Sampo	12
AOC	04	Magnavox	03,08,12	Sanyo	11
Centurion	12	Marantz	04,13	Scott	12
Coronado	03	MGA/Mitsubishi	04,12,13,17	Sears	07,10,11
Curis-Mathes	12	NEC	04,12	Sharp	03,05,18
Daytron	12	Panasonic	06,19	Sylvania	08,12
Emerson	03,04,14	Philco	03,04	Teknika	03,08,14
Fisher	11	Philips	08	Toshiba	07
General Electric	06,10	Pioneer	16	Wards	03,04,12
Gold Star	03,04,17	Portland	03	York	12
Hitachi	02,03	Quasar	06,18	Zenith	15
J.C.Penny	04,12	Radio Shack	05,14		

##### Notes

- If the TV uses a different remote control system from the one programmed to work with the VCR, you cannot control your TV with the remote commander.
- If you enter a new code number, the code number previously entered will be erased.
- When you replace the batteries of the remote commander, the code number automatically resets to 01 (Sony). Reset the appropriate code number.

#### Step 3

##### Hookups

###### Selecting the best hookup option

There are many ways in which your VCR can be hooked up. To hook up your VCR so that it works best for you, first scan through the table below. Then use the accompanying diagrams and procedures on the following pages to set up your VCR. For hookup 1 or 5, use the Sony RM-CM101 Cable Mouse (cable box controller) (not supplied).

If you have	Use	Refer to
TV that has audio/video inputs	Audio/video (A/V) hookup, then follow one of the hookups below.	Pages 8 and 9
Cable box that is compatible with the VCR's cable box control feature	Hookup 1	Pages 10 to 12
No cable box or incompatible cable box with only a few scrambled channels	Hookup 2	Pages 13 to 15
Antenna only, no cable TV	Hookup 3	Pages 16 to 18
Incompatible cable box with many scrambled channels	Hookup 4	Pages 19 to 21
DSS* receiver	Hookup 5	Pages 22 and 23
Incompatible cable box with only a few scrambled channels, using an A/B switch	Hookup 6	Pages 24 to 27

After you've completed the connections, follow the instructions for setup. During setup, if you need more details on the procedure described, page numbers are provided where you can find complete, step-by-step instructions.

After you've completed the setup, you're ready to use your VCR. Procedures differ depending on the hookup you used. For an overview, refer to "Quick reference to using the VCR" on the back cover.

###### Before you get started

- Turn off the power to all equipment.
- Do not connect the AC power cords until all of the connections are completed.
- Be sure you make connections firmly. Loose connections may cause picture distortion.
- If your TV doesn't match any of the examples provided, see your nearest Sony dealer or qualified technician.

\* DSS® is a registered trademark of DIRECTV, Inc., a unit of Hughes Electronics Corporation.

Getting Started

### Step 3: Hookups (continued)

#### Audio/video (A/V) hookup

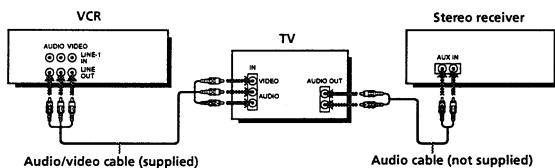

Pages 8 and 9

If your TV has audio/video (A/V) input jacks, you will get a better picture and sound when you hook up your VCR using these connections. In addition, for a true "home theater" experience, you should connect the audio outputs of your VCR or TV to your stereo system. If your TV doesn't have A/V inputs, see the following pages for antenna or cable hookups.

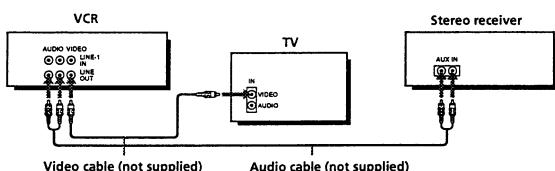

If you're not planning to use your VCR to record programs, you're finished setting up the VCR after you've made the connections shown on pages 8 and 9.

If you want to record off-air or off your cable TV system, complete these connections first, and then go to the following pages for antenna or cable hookups.

##### A Use this hookup if your TV has stereo jacks

##### B Use this hookup if your TV doesn't have stereo jacks

##### Note

To play a tape in stereo, you must use the A/V connection.

Getting Started

### Step 3: Hookups (continued)

#### Hookup 1

Pages 10 to 12

##### Using cable box control

###### Recommended use

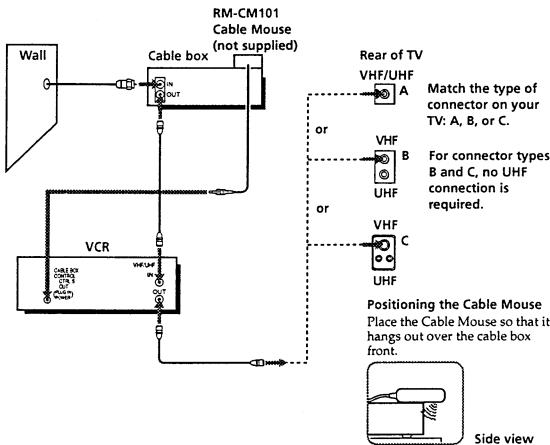

You should use this hookup if you have a cable box, especially if your cable system scrambles all or most channels. This hookup allows the VCR's cable box control feature to control the channel on the cable box, simplifying the recording process. A list of compatible cable boxes is on pages 32 and 33.

###### What you can do with this hookup

- Record any channel using the VCR's cable box control feature to select channels on the cable box

###### What you can't do

- Record with the cable box turned off
- Record one channel while watching another channel

#### Hookup 1: VCR setup

- Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel.

For details, see page 69. If you made A/V connections (from page 8), you can skip this step.

- Turn on your cable box.

- Press EASY SET UP on the VCR.

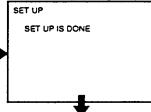

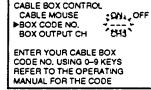

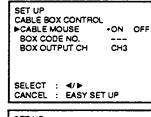

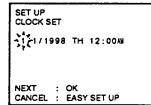

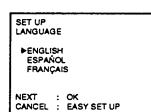

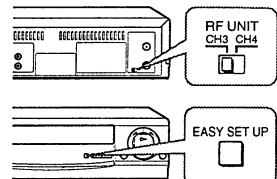

• The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press OK. For details, see page 28.

• The CLOCK SET menu appears. Set the clock and press OK. For details, see page 29.

• The CABLE BOX CONTROL menu appears. Select ON. For details, see page 31.

• Enter your cable box code number and press OK. For details, see page 32.

• Select your cable box output channel and press OK.

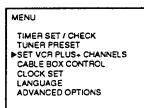

Normal display  
continued

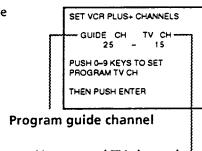

**Hookup 1: VCR Plus+ channel setup**

- Find the VCR Plus+ Channel Listing in your program guide. For details, see page 42.
- If the channels in the program guide are different from the channels that you actually use on your TV, set the channels that are different as follows. For details, see page 43.

① Press MENU and select SET VCR PLUS+ CHANNELS.

② Enter the program guide channel, then the channel you use on your TV.

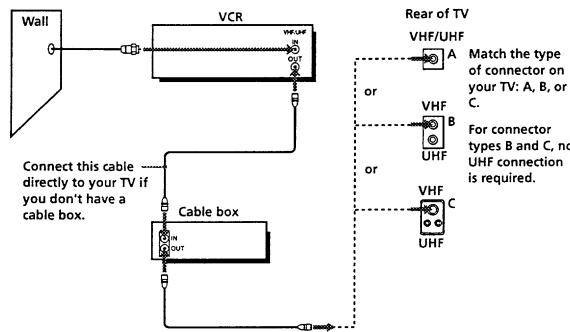

③ Press OK.

**Hookup 2****No cable box, or compatible cable box with only a few scrambled channels****Recommended use**

Use this hookup if you do not have a cable box. Also use this hookup if your cable company cannot supply a cable box that is compatible with the VCR's cable box control feature, and your cable system scrambles only a few channels.

**What you can do with this hookup**

- Record any unscrambled channel by selecting the channel on the VCR.
- What you can't do**
- Record scrambled channels that require a cable box.

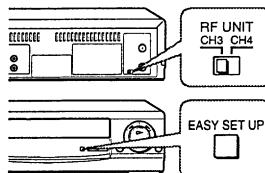

continued

## Step 3: Hookups (continued)

**Hookup 2: VCR setup**

- Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel. For details, see page 69. If you made A/V connections (from page 8), you can skip this step.

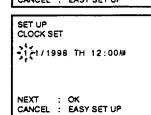

- Press EASY SET UP on the VCR.

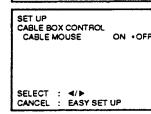

① The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press OK. For details, see page 28.

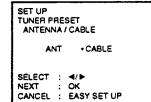

② The CLOCK SET menu appears. Set the clock and press OK. For details, see page 29.

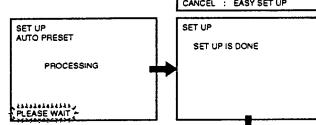

③ The CABLE BOX CONTROL menu appears. Select OFF and press OK.

④ The TUNER PRESET menu appears. Set ANTENNA / CABLE to CABLE and press OK. For details, see page 36.

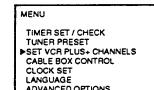

⑤ The AUTO PRESET starts.

**Hookup 2: VCR Plus+ channel setup**

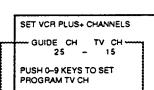

- Find the VCR Plus+ Channel Listing in your program guide. For details, see page 42.

- If the channels in the program guide are different from the channels that you actually use on your TV, set the channels that are different as follows. For details, see page 43.

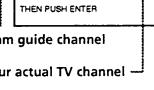

① Press MENU and select SET VCR PLUS+ CHANNELS.

② Enter the program guide channel, then the channel you use on your TV.

③ Press OK.

### Step 3: Hookups (continued)

#### Hookup 3

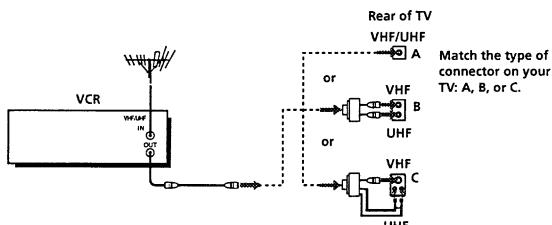

Pages 16 to 18

##### Antenna hookup

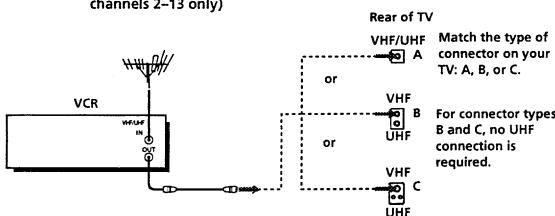

Make the following connections if you're using an antenna (if you don't have cable TV).

###### A Use this hookup if you're using:

- VHF/UHF antenna (you get channels 2–13 and channels 14 and higher)
- UHF-only antenna (you get channels 14 and higher)
- Separate VHF and UHF antennas

###### B Use this hookup if you're using a VHF-only antenna (you get channels 2–13 only)

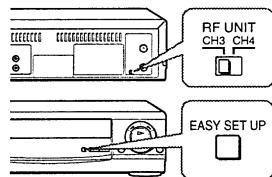

##### If you cannot connect your antenna cable to the VCR directly

If your antenna cable is a flat cable (300-ohm twin lead cable), attach an external antenna connector (not supplied) so that you can connect the cable to the VHF/UHF IN connector. If you have separate cables for VHF and UHF antennas, you should use a U/V band mixer (not supplied). For details, see page 70.

#### Hookup 3: VCR setup

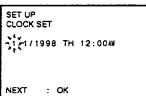

- 1 Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel. For details, see page 69. If you made A/V connections (from page 8), you can skip this step.
- 2 Press EASY SET UP on the VCR.

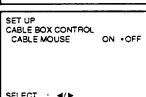

① The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press OK. For details, see page 28.

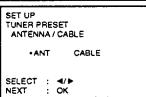

② The CLOCK SET menu appears. Set the clock and press OK. For details, see page 29.

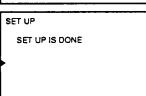

③ The CABLE BOX CONTROL menu appears. Select OFF and press OK.

④ The TUNER PRESET menu appears. Set ANTENNA/CABLE to ANT and press OK. For details, see page 36.

⑤ The AUTO PRESET starts.

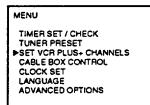

Normal display continued

### Step 3: Hookups (continued)

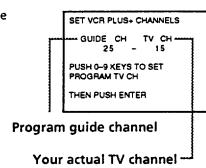

#### Hookup 3: VCR Plus+ channel setup

- 1 Find the VCR Plus+ Channel Listing in your program guide. For details, see page 42.
- 2 If the channels in the program guide are different from the channels that you actually use on your TV, set the channels that are different as follows. For details, see page 43.

① Press MENU and select SET VCR PLUS+ CHANNELS.

② Enter the program guide channel, then the channel you use on your TV.

③ Press OK.

#### Hookup 4

Pages 19 to 21

##### Incompatible cable box with many scrambled channels

###### Recommended use

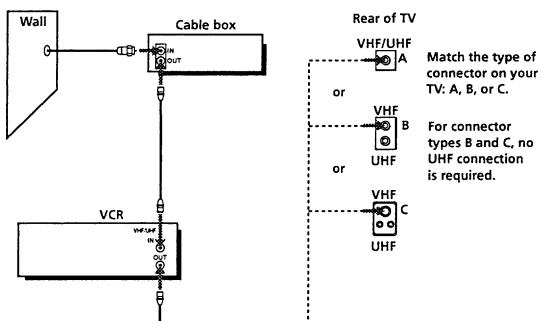

Use this hookup if your cable company cannot supply a cable box that is compatible with the VCR's cable box control feature, and your cable system scrambles all or most channels.

###### What you can do with this hookup

- Record any channel by selecting the channel on the cable box

###### What you can't do

- Record with the cable box turned off
- Record one channel while watching another channel
- Select channels directly on the VCR

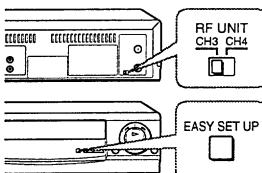

continued

**Step 3: Hookups (continued)****Hookup 4: VCR setup**

- 1 Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel.

For details, see page 69. If you made A/V connections (from page 8), you can skip this step.

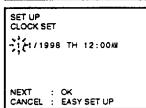

- 2 Turn on your cable box.

- 3 Press EASY SET UP on the VCR.

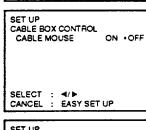

- ① The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press OK. For details, see page 28.

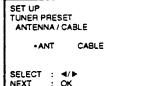

- ② The CLOCK SET menu appears. Set the clock and press OK. For details, see page 29.

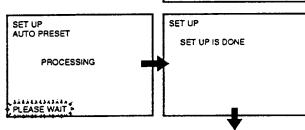

- ③ The CABLE BOX CONTROL menu appears. Select OFF and press OK.

- ④ The TUNER PRESET menu appears. Set ANTENNA/CABLE to ANT and press OK. For details, see page 36.

- ⑤ The AUTO PRESET starts.

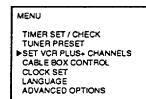

Normal display

**Hookup 4: VCR Plus+ channel setup**

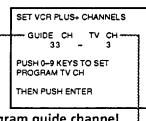

- 1 Find the VCR Plus+ Channel Listing in your program guide. For details, see page 42.

- 2 Enter all the channels you want to record and the cable box output channel (usually 2, 3, or 4). For details, see page 43.

- ① Press MENU and select SET VCR PLUS+ CHANNELS.

- ② Enter the program guide channel, then the cable box output channel.

- ③ Press OK.

Program guide channel

Cable box output channel

**Step 3: Hookups (continued)****Hookup 5**

Pages 22 and 23

**DSS (Digital Satellite System) receiver****Recommended use**

Use this hookup if you have a DSS receiver. It allows the VCR's cable box control feature to control the channel on the DSS receiver, simplifying the recording process. A list of compatible DSS receivers is on page 32.

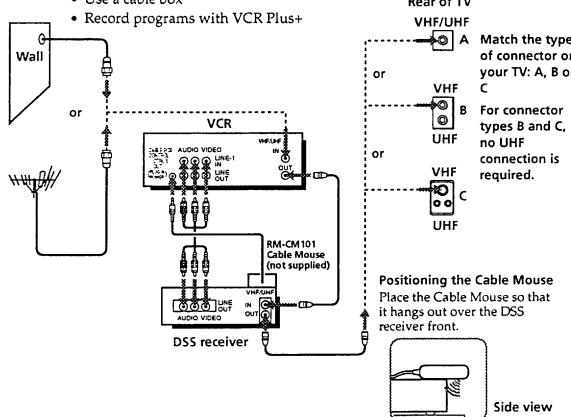

DSS (Digital Satellite System) is a satellite broadcast that provides superior digital-quality video and crisp digital-quality audio. A variety of program packages are available through your program providers. It also has program guides that are sorted by program categories.

**What you can do with this hookup**

- Record any channels using the VCR's cable box control feature to select channels on the DSS receiver

**What you can't do**

- Record with the DSS receiver turned off
- Record any channels from cable or an antenna (To record channels from cable or an antenna, turn off the cable box control feature.)
- Use a cable box
- Record programs with VCR Plus+

**Hookup 5: VCR setup**

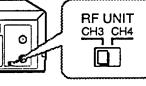

- 1 Set the RF UNIT switch to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel.

For details, see page 69. If you made A/V connections (from page 8), you can skip this step.

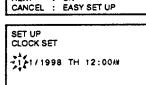

- 2 Turn on your DSS receiver.

- 3 Press EASY SET UP on the VCR.

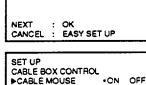

- ① The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press OK. For details, see page 28.

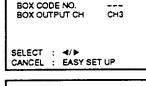

- ② The CLOCK SET menu appears. Set the clock and press OK. For details, see page 29.

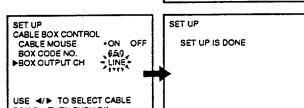

- ③ The CABLE BOX CONTROL menu appears. Select ON. For details, see page 31.

- ④ Enter your DSS receiver code number and press ↓. For details, see page 32.

- ⑤ Set your DSS receiver output channel (BOX OUTPUT CH) to LINE and press OK.

Normal display

### Step 3: Hookups (continued)

#### Hookup 6

Pages 24 to 27

##### Incompatible cable box with only a few scrambled channels, using an A/B switch

###### Recommended use

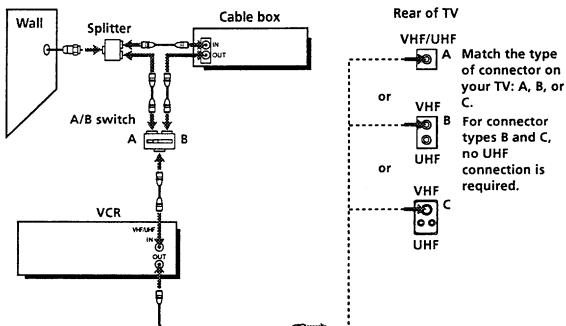

By using an A/B switch (not supplied), this hookup allows you to record both scrambled and unscrambled channels conveniently.

###### What you can do with this hookup

- Record any unscrambled channel by selecting the channel directly on the VCR (the A/B switch is set to A)
- Record any scrambled channel by selecting the channel on the cable box (the A/B switch is set to B)

###### What you can't do

- Record one scrambled channel while watching another channel (the A/B switch is set to B)

#### Hookup 6: VCR setup

- Set the RF UNIT switch to CH3 or CH4, whichever channel is not used in your area. If both are used, set the switch to either channel.

For details, see page 69. If you made A/V connections (from page 8), you can skip this step.

- Set the A/B switch to "A."
- Press EASY SET UP on the VCR.

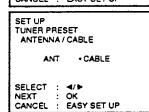

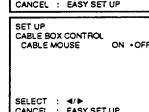

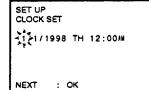

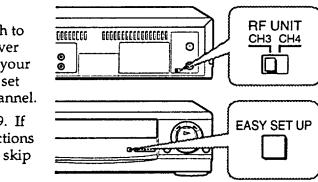

① The LANGUAGE menu appears. Change the on-screen display language to Spanish (ESPAÑOL) or French (FRANÇAIS) if desired, and press OK. For details, see page 28.

② The CLOCK SET menu appears. Set the clock and press OK. For details, see page 29.

③ The CABLE BOX CONTROL menu appears. Select OFF and press OK.

④ The TUNER PRESET menu appears. Set ANTENNA/CABLE to CABLE and press OK. For details, see page 36.

⑤ The AUTO PRESET starts.

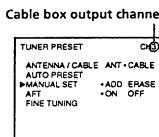

Normal display

Getting Started

### Step 3: Hookups (continued)

- Preset the cable box output channel (usually 2, 3 or 4). For details, see page 38.
  - Press MENU and select TUNER PRESET.
  - Enter the cable box output channel.
  - Set MANUAL SET to ADD and press OK.

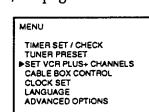

#### Hookup 6: VCR Plus+ channel setup

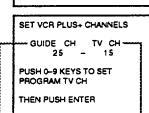

- Find the VCR Plus+ Channel Listing in your program guide. For details, see page 42.

- For unscrambled channels, if the channels in the program guide are different from the channels that you actually use on your TV, set the channels that are different as follows. For details, see page 43.

- Press MENU and select SET VCR PLUS+ CHANNELS.

- Enter the program guide channel, then the channel you use on your TV.

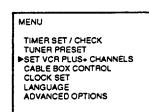

- Press OK.

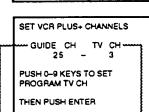

Your actual TV channel

- For scrambled channels, enter all the scrambled channels you want to record and the cable box output channel (usually 2, 3, or 4). For details, see page 43.

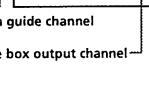

- Press MENU and select SET VCR PLUS+ CHANNELS.

- Enter the program guide channel, then the cable box output channel.

- Press OK.

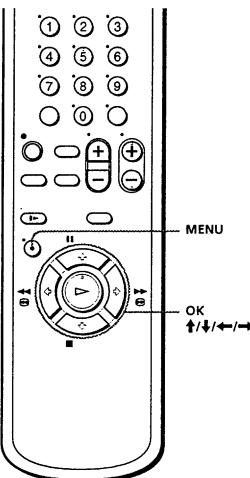

Cable box output channel

Getting Started

## Selecting a language

You can change the on-screen display language.

- 1** Press MENU, then press **↑/↓** to move the cursor (**>**) to LANGUAGE and press OK.

When using the EASY SET UP procedure, skip this step.

LANGUAGE  
►ENGLISH  
ESPAÑOL  
FRANÇAIS

- 2** Press **↑/↓** to select ENGLISH, ESPAÑOL, or FRANÇAIS, then press OK.

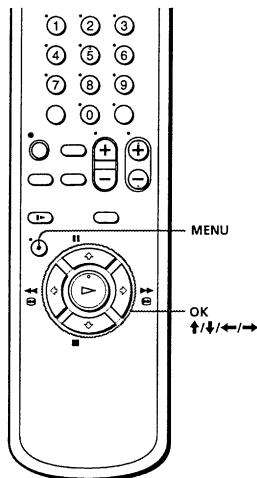

Press **↑/↓** to select ENGLISH, ESPAÑOL, or FRANÇAIS, then press OK.

## Setting the clock

Set the time and date to use the timer feature for recording programs.

### Before you start...

- Turn on the VCR and the TV.
- Set the TV to the VCR channel (channel 3 or 4). If your TV is connected to the VCR using A/V connections, set the TV to video input.
- Press TV/VIDEO to display the VIDEO indicator in the VCR's display window.

- 1** Press MENU, then press **↑/↓** to move the cursor (**>**) to CLOCK SET and press OK.

When using the EASY SET UP procedure, skip this step.

CLOCK SET  
11/1/1998 TH 12:00M

- 2** Press **↑/↓** to set the month.

CLOCK SET  
11/1/1998 SU 12:00M

continued

## Setting the clock (continued)

- 3** Press **→** to flash the day and press **↑/↓** to set the day.  
The day of the week is set automatically.

CLOCK SET  
11/1/1998 MO 12:00M

- 4** Set the year, hour, and minutes in the same way as the day.

- 5** Press OK to start the clock.

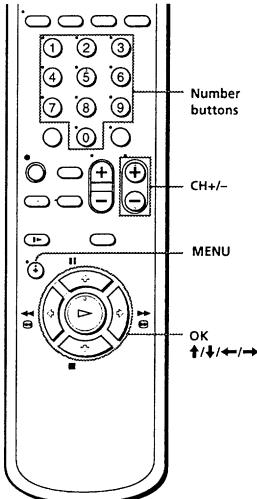

## Setting up cable box control

### (Skip this section if you are using Hookup 2, 3, 4 or 6.)

Your VCR includes a cable box control feature that allows the VCR to control most brands of cable boxes/DSS receivers via an optional Cable Mouse. With cable box control, the VCR controls channels on the cable box/DSS receiver for timer recording. You can also use the VCR's remote commander to change channels on the cable box/DSS receiver whenever the cable box/DSS receiver is turned on even if the VCR is turned off. To use cable box control, you need to connect the Sony RM-CM101 Cable Mouse (not supplied) (pages 10 and 22) and set the code number and output channel.

This VCR is programmed with codes necessary to control channel selection on most brands of cable boxes at the time this VCR was manufactured. It is possible that new cable boxes may be introduced that cannot be controlled with the RM-CM101 Cable Mouse. If you have a cable box that is incompatible with this VCR, contact your cable operator — they may be able to provide you with a compatible cable box.

- 1** Press MENU, then press **↑/↓** to move the cursor (**>**) to CABLE BOX CONTROL and press OK.

When using the EASY SET UP procedure, skip this step.

CABLE BOX CONTROL  
CABLE MOUSE ON/OFF  
USE </> TO SELECT  
PUSH MENU TO QUIT

- 2** Press **</>** to select ON.  
“—” flashes in the BOX CODE NO. row.

If a code number has already been entered, press **↓** to select BOX CODE NO.

Getting Started

### Setting up cable box control (continued)

#### To ensure correct operation

- Place the Cable Mouse so that it hangs out over the cable box/DSS receiver front.
- Do not place the cable box/DSS receiver on top of the VCR.
- Position the cable box/DSS receiver away from the VCR.
- Point the remote commander at the VCR, not at the cable box/DSS receiver.

#### If you cannot get your VCR to control the cable box/DSS receiver

- Check that the Cable Mouse is connected to the CABLE BOX CONTROL jack on the VCR.
  - Check the position of the Cable Mouse.
  - Place the cable box/DSS receiver and VCR away from each other. Do not place the cable box/DSS receiver on top of the VCR.
  - Try the setup again making sure to use the correct control code. If the cable box still does not respond, try the other codes that are listed.
- If your cable box still does not operate with the Cable Mouse, contact your cable company to see if they provide you with a compatible cable box.

#### Note

- Make sure you turn off the VCR when you plug in or unplug the Cable Mouse. If you unplug the Cable Mouse and plug it in again, turn on the VCR before you use the cable box/DSS receiver control feature.

Getting Started

#### To check the cable box control setting

- Press CH +/- on the remote commander. Does the channel indicator on the cable box/DSS receiver change? (Point the remote commander at the VCR, not at the cable box/DSS receiver.)
- Press all 10 number buttons (0 to 9) on the remote commander. Does the channel indicator on the cable box/DSS receiver change?

If the answer to both 1 and 2 is "yes," you have made the correct setting.

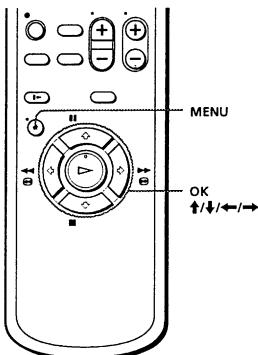

## Presetting channels

(Skip this section if you are using cable box/DSS receiver control.)

This VCR is capable of receiving VHF channels 2 to 13, UHF channels 14 to 69 and unscrambled CATV channels 1 to 125. First, we recommend that you preset the receivable channels in your area using automatic presetting. Then, if there are any unwanted channels, disable them manually. If you have decided which channels you wish to preset, set them directly using manual presetting.

### Before you start...

- Turn on the VCR and the TV.
- Set the TV to the VCR channel (channel 3 or 4). If your TV is connected to the VCR using A/V connections, set the TV to video input.
- Press TV/VIDEO to display the VIDEO indicator in the VCR's display window.

### Presetting all receivable channels automatically

**1**

Press MENU, then press  $\uparrow/\downarrow$  to move the cursor ( $\blacktriangleright$ ) to TUNER PRESET and press OK.

When using the EASY SET UP procedure, skip this step.

TUNER PRESET	CH1
ANTENNA / CABLE	ANT + CABLE
AUTO PRESET	►AUTO PRESET
MANUAL SET	►MANUAL SET
AFT	•ADD ERASE
FINE TUNING	•ON OFF

**2**

Press  $\uparrow/\downarrow$  to select ANTENNA/CABLE.

**3**

- To preset cable TV channels: Press  $\leftarrow/\rightarrow$  to set ANTENNA/CABLE to CABLE.

TUNER PRESET	CH1
►ANTENNA / CABLE	ANT + CABLE
AUTO PRESET	►AUTO PRESET
MANUAL SET	►MANUAL SET
AFT	•ADD ERASE
FINE TUNING	•ON OFF

- To preset VHF and UHF channels: Press  $\leftarrow/\rightarrow$  to set ANTENNA/CABLE to ANT.

TUNER PRESET	CH2
►ANTENNA / CABLE	ANT + CABLE
AUTO PRESET	►AUTO PRESET
MANUAL SET	►MANUAL SET
AFT	•ADD ERASE
FINE TUNING	•ON OFF

**4**

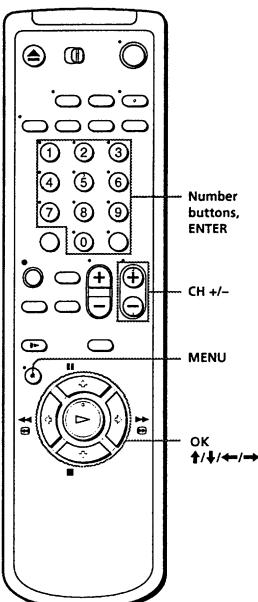

Press  $\uparrow/\downarrow$  to select AUTO PRESET, then press OK.

All receivable channels are preset in numerical sequence. When no more receivable channels can be found, presetting stops and the picture from the lowest numbered channel is displayed on the TV screen.

*continued*

### Presetting channels (continued)

#### Presetting/disabling channels manually

**1**

Press MENU and select TUNER PRESET, then press OK.

TUNER PRESET	CH1
ANTENNA / CABLE	ANT + CABLE
AUTO PRESET	►AUTO PRESET
►MANUAL SET	►MANUAL SET

AFT ON OFF  
FINE TUNING

Getting Started

**Tip**  
• To select the channel in step 2 above, you can also use the CH +/- buttons. In this case, you don't need to press ENTER.

## Setting up VCR Plus+

#### How VCR Plus+ works

Whenever you want to record a TV program, all you need to do is look up the program's "PlusCode," a number assigned to each program that's published in the TV section of most newspapers, cable TV listings, and even *TV GUIDE* magazine. Then, just enter the PlusCode of the program you want and the VCR is automatically programmed to record that show. It's that simple.

#### How to set up your VCR

Setting up your VCR involves coordinating the TV channel number (the number you turn to on your TV or VCR to watch a program) with the guide channel (the number that's assigned to that channel in your program guide). To get the guide channel numbers, find the "Channel Line-up Chart" in the program guide for your area that features VCR PlusCodes. It usually looks like the example to the right.

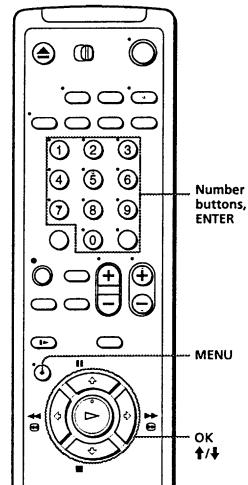

For each channel your VCR receives, use the Channel Line-up Chart to check that the channel numbers match. For example, if HBO is listed in the Channel Line-up Chart on channel 33, and your VCR receives HBO on channel 5, you need to coordinate these numbers using the following procedure. For channels in which the numbers are the same, you can skip this procedure.

#### Example of "PlusCode"

PlusCode  
5:30 [1] MOVIE — Musical (2hrs.) 33044  
[2] SPORT — Golf (1hr., 25min.) 42060  
CNN — WS 9974  
6:30 [2][3] DRAMA — Comedy (2hrs.) 17390  
[3] SCIENCE AND TECHNOLOGY  
(1hr. 15min.) 73457

#### Example of "Channel Line-up Chart"

CABLE CH	CABLE TV	VCR Plus+ GUIDE CH
16	AMC American Movie Classics	35
17	Bravo (program grid only)	54
20	CNN Cable News Network	42
21	C-SPAN	28
22	CBS The Disney Channel	53
25	DSC The Discovery Channel	37
34	ESPN	34
35	FAM The Family Channel	47
5	HBO Home Box Office	33

51	USA USA Network	44

- 1** Press MENU, then press ↑/↓ to move the cursor (►) to SET VCR PLUS+ CHANNELS and press OK.

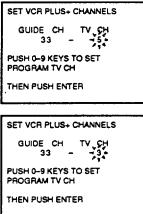

SET VCR PLUS+ CHANNELS  
GUIDE CH TV CH  
PUSH 0-9 KEYS TO SET  
PROGRAM GUIDE CH  
OR PUSH OK TO SEE  
VCR PLUS+ CHANNEL LIST

- 2** Enter the channel number assigned in the program guide and press ENTER.

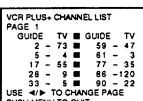

SET VCR PLUS+ CHANNELS  
GUIDE CH TV CH  
PUSH 0-9 KEYS TO SET  
PROGRAM GUIDE CH  
THEN PUSH ENTER

Getting Started

### Setting up VCR Plus+ (continued)

- 3** 
- If you made Hookup 1, 2, or 3: Enter the actual number on your TV (and VCR) and press ENTER.
  - If you made Hookup 4: Enter the cable output channel (usually 2, 3 or 4) and press ENTER.
  - If you made Hookup 6: Enter the actual number on your TV (and VCR) for an unscrambled channel and press ENTER. For a scrambled channel, enter the cable box output channel (usually 2, 3 or 4) and press ENTER.

- 4** Repeat steps 2 and 3 for each channel whose numbers don't match.

- 5** When you have set all channels, press OK to confirm your channel settings. 

- 6**  When you've finished, press MENU to exit.

### Playing a tape (continued)

- 3**  Press ▷ PLAY.

When the tape reaches the end, it will rewind automatically.

#### Additional tasks

To	Press
Stop play	■ STOP
Pause play	■ PAUSE
Resume play after pause	■ PAUSE or ▷ PLAY
Fast-forward the tape	►► FF during stop
Rewind the tape	◀◀ REW during stop
Eject the tape	▲ EJECT

#### To skip playback

You can skip a portion of playback you don't want to watch such as a commercial and restart playback by pressing a single button.

Press SMART CUE during playback of the scene you want to skip. The VCR starts searching.

Press SMART CUE again when you find the scene you want to watch. The VCR stops searching, rewinds a few seconds, then resumes normal playback.

#### To use the time counter

At the point on the tape that you want to find later, press COUNTER RESET. The counter in the display window resets to "0:00:00." Search for the point afterwards by referring to the counter.

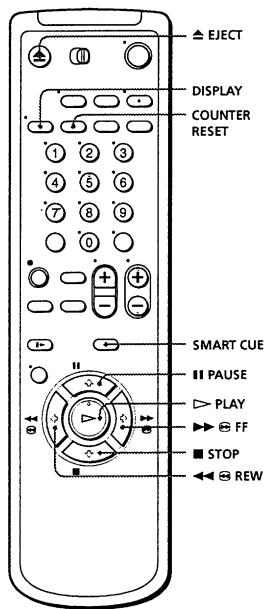

To display the counter on the TV screen, press DISPLAY repeatedly.

#### Notes

- Tapes recorded in the LP mode on other VCRs can be played back on this VCR but the picture quality cannot be guaranteed.
- While setting the menu on the TV screen, you cannot use the ▷ PLAY, ■ PAUSE, ►► FF, ▲ REW, or ■ STOP buttons.
- The counter resets to "0:00:00" whenever a tape is reinserted.
- The counter stops counting when it comes to a portion with no recording.

## Playing a tape

- 1** Turn on your TV and set it to the video channel.

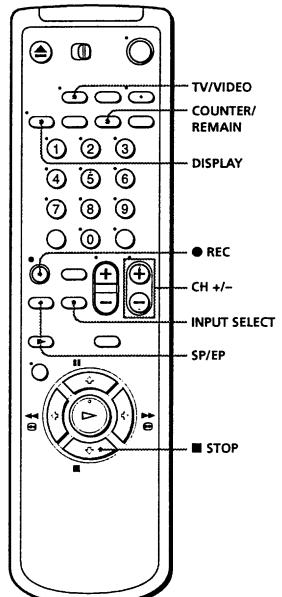

- 2** Insert a tape.

The VCR turns on and starts playing automatically if you insert a tape with its safety tab removed.

continued

## Recording TV programs

- 1** Turn on your TV and set it to the video channel.  
To record from a cable box, turn it on.

- 2** Insert a tape with its safety tab in place.

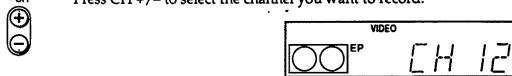

continued

### Recording TV programs (continued)

- 3** INPUT SELECT Press INPUT SELECT until a channel number appears in the display window.

- 4** +CH Press CH +/- to select the channel you want to record.

- 5** SP / EP Press SP/EP to select the tape speed, SP or EP.

EP (Extra Play) provides recording time three times as long as SP (Standard Play), however, SP produces better picture and audio quality.

- 6** ●REC Press ● REC to start recording.

The recording indicator lights up red in the display window.

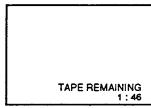

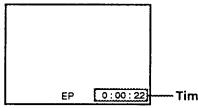

#### To stop recording

Press ■ STOP.

#### To check the remaining time

Press DISPLAY repeatedly until the time counter appears on the TV screen. With the display on, press COUNTER/REMAIN to check the remaining time. Each time you press COUNTER/REMAIN, the time counter and the remaining time appear alternately. The Q indicator also appears in the display window.

To check the remaining time of a T-140 or T-180 tape, set TAPE SELECT in the ADVANCED OPTIONS menu to "180." (For details, see page 66.)

#### To watch another TV program while recording

- 1 Press TV/VIDEO to turn off the VIDEO indicator in the display window.
- 2 If the TV is connected to the VCR's LINE OUT jacks, set the TV to TV input; if not, skip this step.
- 3 Select another channel on the TV.

#### To save a recording

To prevent accidental erasure, break off the safety tab as illustrated. To record on a tape again, cover the tab hole with adhesive tape.

**continued**

### Recording TV programs (continued)

#### Tips

- To select a channel, you can use the number buttons on the remote commander. Enter the channel number, then press ENTER.
- You can select a video source from the LINE-1 IN or LINE-2 IN jacks using the INPUT SELECT button.
- The display appears on the TV screen indicating information about the tape, but the information won't be recorded on the tape.
- If you don't want to watch TV while recording, you can turn off the TV. When using a cable box, make sure to leave it on.

#### Notes

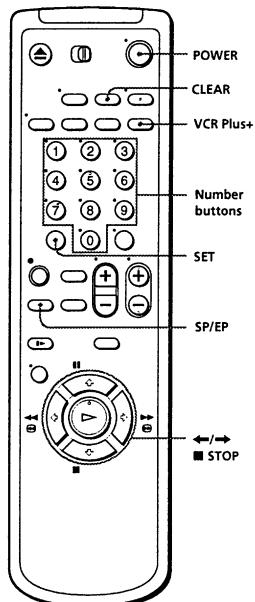

- The remaining time may not be indicated accurately for:
  - short tapes less than T-20
  - T-130
  - T-210
  - tapes recorded in the LP mode.
- The display doesn't appear during still (pause) mode, search mode or slow-motion playback.
- It may take up to one minute for the VCR to calculate and display the remaining time after you press DISPLAY.

### Recording TV programs using VCR Plus+

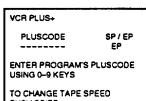

Just enter the program's PlusCode listed in the TV program guide. The date, times and channel number of that program are set automatically. You can preset up to eight programs at a time.

#### Before you start...

- Check that the VCR clock is set to the correct time.
- Turn on your TV and set it to the video channel. When using a cable box, turn it on.
- Insert a tape with its safety tab in place. Make sure the tape is longer than the total recording time.

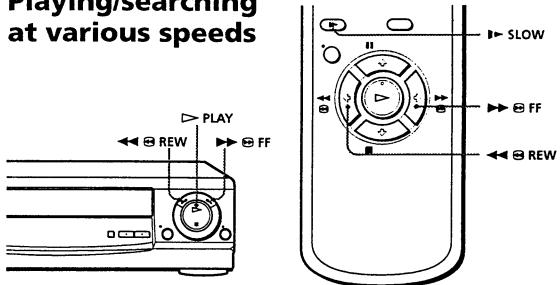

- 1** VCR Plus+ Press VCR Plus+.

**continued**

## Playing/searching at various speeds

Playback options	Operation
View the picture during fast-forward or rewind	During fast-forward, hold $\gg \ominus$ FF down. During forward or rewind, hold $\ll \ominus$ REW down.
Play at high speed	• During playback, press $\gg \ominus$ FF or $\ll \ominus$ REW. • During playback, hold $\gg \ominus$ FF or $\ll \ominus$ REW down. When you release the button, normal playback resumes.
Play in slow motion	During playback or pause, press $\gg$ SLOW.
Play frame by frame	During pause, press $\gg \ominus$ FF or $\ll \ominus$ REW. Hold the button down to play one frame each second.
Rewind and start play	During stop, press $\gg$ PLAY on the VCR while holding $\ll \ominus$ REW down on the VCR.

### To resume normal playback

Press  $\gg$  PLAY.

#### Tips

- Adjust the picture using the TRACKING +/− buttons on the VCR if:
  - Streaks appear while playing in slow motion.
  - The picture shakes while pausing.
- To set tracking to the center position, press both buttons (+/−) at the same time.
- When you hold  $\gg \ominus$  FF or  $\ll \ominus$  REW down during stop, skip-search starts. For details, see page 59.

#### Notes

- The sound is muted during these operations.
- Tapes recorded in the LP mode on other VCRs can be played back on this VCR but the picture quality cannot be guaranteed.
- The picture may have noise when playing at high speed in reverse.

## Searching for a selected point on the tape (continued)

### To cancel searching

Press  $\gg$  PLAY or  $\blacksquare$  STOP.

### To turn off the bar indication

Press DISPLAY again.

#### Notes

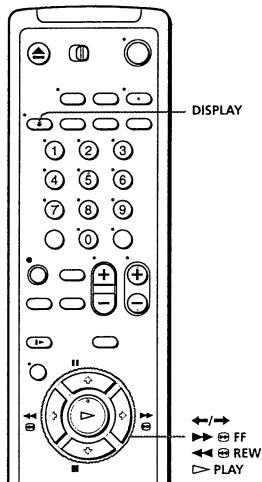

- The figure on the bar indication represents the total time length of the inserted tape as shown below.
- The total time length may not be displayed correctly for:
  - tapes other than T-60, T-120, or T-160
  - tapes recorded in more than one tape speed mode.

Tape type	Total time length		
	SP	LP	EP
T-60 or shorter	60	120	180
from T-80 to T-140	120	240	360
T-160 or longer	160	320	480

- If you move the pointer (+) on the bar indication during search, the VCR searches for the new reset point.
- While the cursor (■) is displayed on the bar indication, the  $\gg \ominus$  FF/ $\gg$  and  $\ll \ominus$  REW/ $\ll$  buttons on the remote commander work only for moving the pointer (+), while the  $\gg \ominus$  FF and  $\ll \ominus$  REW buttons on the VCR work for normal tape operation. Note, however, if you press these buttons on the VCR, searching is canceled.

## Searching for a selected point on the tape

You can easily find a selected point by moving the pointer on the TV screen. The VCR fast-forwards or rewinds to the point you indicate and starts playback automatically.

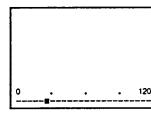

- Press DISPLAY repeatedly until the bar indication appears on the TV screen.

A cursor (■) indicating the current position of the tape appears on the bar indication. If the cursor does not appear, play the tape a few moments (by pressing  $\gg$  PLAY,  $\gg \ominus$  FF or  $\ll \ominus$  REW) until the cursor appears.

- Press  $\leftarrow/\rightarrow$  to move the pointer (+) to the point where you want to start playback.

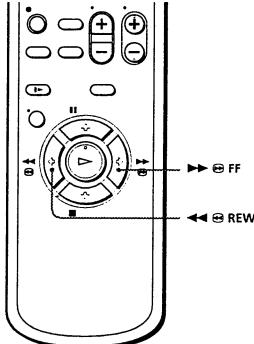

The VCR starts searching and the cursor (■) moves toward the pointer. When the VCR locates the marked point, playback starts.

continued

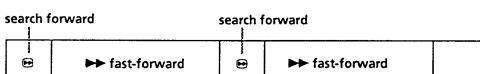

## Skip-searching automatically

You can spot check a whole tape quickly. At intervals, the VCR skips playback while searching forward or backward.

Hold  $\gg \ominus$  FF (or  $\ll \ominus$  REW) down more than two seconds during stop. "SKIP" appears on the TV screen.

The VCR searches forward (or backward) for about two minutes on the counter, then fast-forwards (or rewinds) for about ten minutes on the counter. The VCR repeats this operation until it stops at the end (or beginning) of the tape.

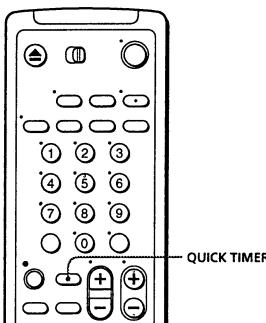

To cancel skip-search  
Press  $\gg$  PLAY or  $\blacksquare$  STOP.

#### Note

- The VCR automatically fast-forwards (or rewinds) any portion with no recording.

## Recording TV programs using the quick timer

After starting recording in the normal way, you can have the VCR stop recording automatically after a specified duration.

- 1 While recording, press QUICK TIMER once.

The **Q** indicator appears in the display window.

- 2 Press QUICK TIMER repeatedly to set the duration.

Each press advances the time in increments of 30 minutes.

The duration decreases minute by minute to 0:00, then the VCR stops recording and turns off automatically.

### To extend the duration

Press QUICK TIMER repeatedly to set to the new duration.

### To stop the VCR while recording

Press **■ STOP**.

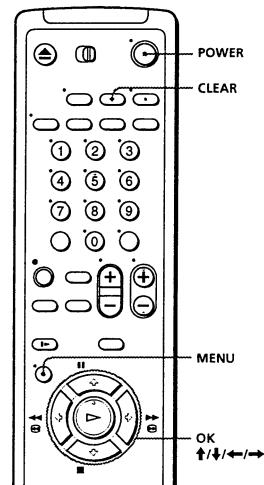

### Using the quick timer during stop mode

You can set the quick timer and start recording during stop mode by pressing QUICK TIMER. To set the channel, you can use the CH +/− or INPUT SELECT buttons. Press QUICK TIMER repeatedly to set the recording duration. The recording will start automatically.

## Checking/ changing/ canceling timer settings

### Before you start...

- Turn on your TV and set it to the video channel.

- 1 Press POWER to turn on the VCR.

- 2 Press MENU and select TIMER SET/CHECK:

- If you want to change a setting, go on to the next step.
- If you do not need to change the settings, press OK, then turn off the VCR to return to recording standby.

- 3 Press **↑/↓** to select the setting you want to change or cancel:

- To change the setting, press **←/→** to flash the item you want to change, and press **↑/↓** to reset it. Then, press **→** repeatedly until the cursor (**>**) appears at the beginning of the line.
- To cancel the setting, press CLEAR.

- 4 Press OK.

If any timer settings remain, turn off the VCR to return to recording standby.

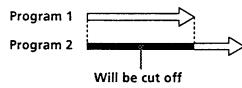

TIMER SET / CHECK	
DATE	
START	STOP
11/17 TU 9:30W	8:00W 69
11/25 WE 9:30W	11:15W 502
12/02 TH 9:30W	11:15W 429
EVERY SU 11:58W	1:30W --
--	--
--	--
--	--

continued

## Checking/ changing/ canceling timer settings (continued)

### When the timer settings overlap

The program that starts first has priority and the second program starts recording only after the first program has finished. If the programs start at the same time, the program listed first in the menu has priority.

## Recording stereo and bilingual programs

### Recording stereo programs

This VCR automatically receives and records stereo programs. When a stereo program is received, the STEREO indicator lights up. If there is noise in the stereo program, set AUTO STEREO in the ADVANCED OPTIONS menu to OFF. The sound will be recorded in monaural (on both hi-fi and normal audio tracks) but with less noise. For details, see page 66.

### Recording bilingual programs

Normally, this VCR records only the main sound. When a SAP (Second Audio Program) is received, the SAP indicator lights up. To record only SAP sound, set TUNER AUDIO in the ADVANCED OPTIONS menu to SAP. For details, see page 66.

### Selecting the sound while playing

Press AUDIO MONITOR to select the desired sound. (The sound being recorded will not change.)

#### Stereo program

To listen to	Indicator on the TV screen
Stereo	STEREO
Left channel	L
Right channel	R
Monaural sound on the normal audio track*	No indicator appears

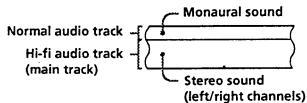

\* Usually the mixed sound of left and right channels

continued

## Recording stereo and bilingual programs (continued)

### How sound is recorded on a video tape

The VCR records sound onto two separate tracks. Hi-fi audio is recorded onto the main track along with the picture. Monaural sound is recorded onto the normal audio track along the edge of the tape.

#### Notes

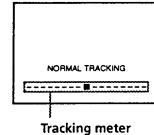

- To play a tape in stereo, you must use the A/V connections.
- When you play a tape recorded in monaural, the sound is heard in monaural regardless of the AUDIO MONITOR setting.

## Adjusting the picture

### Adjusting the tracking

Although the VCR automatically adjusts the tracking when playing a tape (the **■** indicator flashes in the display window, then goes off), distortion may occur if the tape was recorded in poor condition. In this case, manually adjust the tracking.

Press the TRACKING +/- buttons on the VCR to display the tracking meter. The distortion should disappear as you press one of the two buttons (the **■** indicator lights up). To resume automatic tracking adjustment, eject the tape and reinsert it.

Tracking meter

### About Adaptive Picture Control (APC)

Adaptive Picture Control (APC) automatically improves recording and playback quality by adjusting the VCR to the condition of the video heads and tape. To maintain better picture quality, we recommend that you set APC to ON in the ADVANCED OPTIONS menu (with the APC indicator in the display window lit).

#### APC playback

The APC function automatically works on all types of tapes, including rental tapes and tapes that were not recorded with APC.

#### APC recording

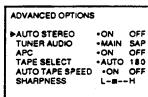

Whenever you insert a tape and first start recording, the VCR adjusts to the tape using the APC function (the APC indicator flashes rapidly). This adjustment is retained until the tape is ejected.

#### Notes

- The auto tracking adjustment cannot be guaranteed to work with tapes recorded in LP mode on other VCRs.
- With the Auto Tape Speed function on, the APC function doesn't work if the tape speed is automatically changed from the SP to EP mode during a timer recording, unless the tape has been recorded in the EP mode with the APC function. For details, see page 66.
- There is a delay of a few seconds before the VCR actually starts recording while the VCR analyzes the tape. To avoid the delay, first set the VCR to recording pause (the APC indicator flashes slowly) and press **REC** to have the VCR analyze the tape. After the APC indicator stops flashing, press **PAUSE** to start recording immediately. If you press **PAUSE** before the APC indicator stops flashing, the APC function is canceled.

## Changing menu options

- Press MENU and select ADVANCED OPTIONS.

- Press **↑/↓** to select the option to change, then press **←/→** to change the setting.
- Press OK to return to the original screen.

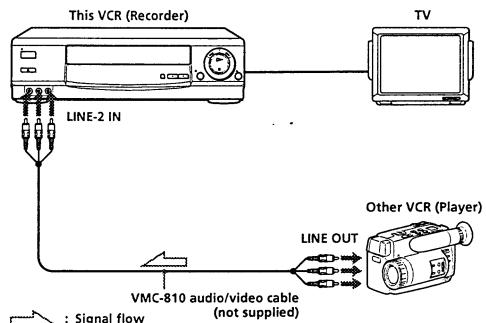

#### Menu choices

Initial settings are indicated in bold print.

Menu option	Set this option to
AUTO STEREO	ON to receive stereo programs. OFF to reduce noise; the sound changes to monaural.
TUNER AUDIO	MAIN to record the main sound. SAP to record the SAP (Second Audio Program) sound.
APC	ON to switch on the APC (Adaptive Picture Control) function and improve picture quality. OFF to switch off APC.
TAPE SELECT	AUTO or 180 (when using a T-140 or T-180 tape) to operate AUTO TAPE SPEED correctly.
AUTO TAPE SPEED	ON to change the timer recording tape speed automatically to the EP mode when the remaining tape becomes shorter than the recording time. OFF to keep the set tape speed.
SHARPNESS	L (Low) through H (High) to adjust the sharpness of the picture. L to turn off the sharpness control.

## Editing with another VCR

### How to hook up to record on this VCR

### How to hook up to a stereo system

Connect LINE-2 IN AUDIO on this VCR to the audio output jacks on the stereo system, using the RK-C510KS audio cable (not supplied).

#### Notes

- Make sure you connect the plugs to jacks of the same color.
- If the other VCR is a monaural type and connected to this VCR's LINE-2 IN jacks, connect the audio plug to the AUDIO L (white) jack. The sound is recorded on both right and left channels. When connecting to the AUDIO R (red) jack, the sound is recorded only on the right channel.
- If you connected this VCR to both the LINE IN and LINE OUT jacks of the other VCR, select the input correctly to prevent a humming noise.
- You can also use the LINE-1 IN jacks instead. If the other VCR is a monaural type, the sound is recorded only on the channel whose jack is connected to the audio plug. To record on both right and left channels, connect the audio plugs to the AUDIO R/L jacks using a VMC-910MS audio/video cable (not supplied).

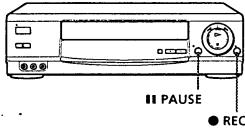

continued

### Editing with another VCR (continued)

#### Operation (when recording on this VCR)

##### Before you start editing

- Turn on your TV and set it to the video channel.
- Press INPUT SELECT on the remote commander to display "L1" or "L2" in the display window.
- Press SP/EP on the remote commander to select the tape speed, SP or EP.

- Insert a source tape with its safety tab removed into the other (playback) VCR. Search for the point to start playback and set it to playback pause.
- Insert a tape with its safety tab in place into this (recording) VCR. Search for the point to start recording and press PAUSE.
- Press REC on this VCR and set it to recording pause.
- To start editing, press the PAUSE buttons on both VCRs at the same time.

##### To stop editing

Press the STOP buttons on both VCRs.

##### Note

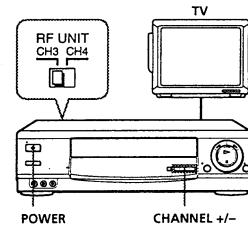

- If you start recording following the procedure above, the VCR won't start recording with the APC function. To record a tape with the APC function, press REC again during recording pause in step 3 so that the VCR analyzes the tape. Then when you start recording in step 4, press PAUSE immediately after the APC indicator stops flashing. If you press PAUSE before the APC indicator stops flashing, the APC function is canceled.

### Additional Information

## General setup information

#### Setting the RF unit

When connecting the VCR to the TV using only the antenna cable, you must set the RF UNIT switch on the rear of the VCR so that the TV can receive the correct signal from the VCR.

- Set the RF UNIT switch on the rear of the VCR to CH 3 or CH 4, whichever channel is not used in your area. If both are used, set the switch to either channel.
- Press POWER to turn on the VCR.
- Press TV/VIDEO on the remote commander to turn on the VIDEO indicator in the VCR's display window.
- Press CHANNEL +/- to display a channel number in the display window. Select an active channel number in your area.
- Turn on your TV and set it to the channel you selected in step 1 (channel 3 or 4).

The selected TV channel broadcast appears on the TV screen. If the channels change when you press CHANNEL +/-, you have made the correct setting.

Whenever you use the VCR, set the TV to the channel selected in step 1.

*continued*

### General setup information (continued)

#### Attaching the external antenna connector

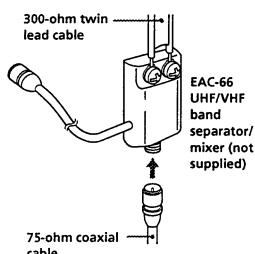

When using a 300-ohm twin lead cable for a VHF/UHF antenna, use the EAC-32 antenna connector (not supplied) to connect the antenna to the VCR.

- Loosen the screws on the antenna connector.
- Wind the twin leads around the screws on the antenna connector.
- Retighten the screws.

#### Attaching a UHF/VHF band mixer

When using both a 75-ohm coaxial cable and a 300-ohm twin lead cable for a VHF/UHF antenna, use the EAC-66 UHF/VHF band separator/mixer (not supplied) to connect the antenna to the VCR.

- Loosen the screws on the mixer.
- Wind the twin leads around the screws on the mixer.
- Retighten the screws.
- Connect the 75-ohm coaxial cable to the mixer.

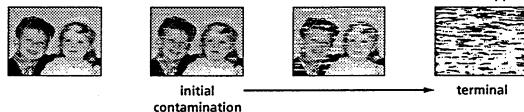

## Troubleshooting

If you have any questions or problems not covered below, please consult your nearest Sony dealer.

Symptom	Remedy
Power The POWER switch does not function.	<ul style="list-style-type: none"> <li>Connect the AC power cord securely.</li> <li>Make sure the VCR is not locked. To unlock, hold POWER down on the VCR until the <i>on</i> indicator disappears.</li> </ul>
Clock The clock has stopped and "— ——" lights in the display window.	<ul style="list-style-type: none"> <li>The clock stops if the VCR is disconnected from the wall outlet for more than one hour. Reset the clock (and timer).</li> </ul>
Playback The playback picture does not appear on the TV screen.	<ul style="list-style-type: none"> <li>Make sure the TV is set to the channel for the VCR. If you are using a monitor, set it to video input.</li> </ul>
Playback The picture is not clear.	<ul style="list-style-type: none"> <li>Adjust the tracking with the TRACKING +/- buttons.</li> <li>The video heads are dirty (see below). Clean the video heads using the Sony T-25CLD, T-25CLDR, or T-25CLW video head cleaning cassette. If these cleaning cassettes are not available in your area, have the heads cleaned at your nearest Sony service facility (a standard service charge will be required). Do not use a liquid-type cleaning cassette other than Sony's, as it may damage the video heads.</li> <li>The video heads may have to be replaced. Consult your local Sony dealer for more information.</li> </ul>
Playback The picture rolls vertically during picture search.	<ul style="list-style-type: none"> <li>Adjust the vertical hold control on the TV or monitor.</li> </ul>
Playback The picture has no sound.	<ul style="list-style-type: none"> <li>The tape is defective. Use a new tape.</li> </ul>

#### Symptoms caused by contaminated video heads

- Normal picture
- Rough picture
- Unclear picture
- No picture (or black & white screen appears)

**THIS NOTE IS COMMON FOR PRINTED WIRING BOARDS AND SCHEMATIC DIAGRAMS.  
(In addition to this, the necessary note is printed in each block.)**

- For printed wiring boards.
- — : Pattern from the side which enables seeing.

**Caution :**  
Pattern face side: Parts on the pattern face side (Conductor Side) seen from the pattern face are indicated.  
Pattern face side: parts on the parts face side seen (Component Side) from the parts face are indicated.

- For schematic diagrams.
- Caution when replacing chip parts.  
New parts must be attached after removal of chip.  
Be careful not to heat the minus side of tantalum capacitor, because it is damaged by the heat.
- All resistor are in ohms, 1/4W unless otherwise noted.  
Chip resistor are 1/10W unless otherwise noted.  
kΩ: 1000Ω, MΩ: 1000kΩ.
- All capacitors are in μF unless otherwise noted. pF: μμF. 50V or less are not indicated except for electrolytics and tantalums.
- □: panel designation.
- △: internal component.
- —: B+ Line. \*
- - - -: B- Line. \*
- ▶: IN/OUT direction of (+,-) B LINE. \*
- Circled numbers refer to waveforms. \*
- Readings are taken with a color-bar signal input.
- Voltage are dc between ground and measurement points.\*
- Readings are taken with a digital multimeter (DC10MΩ).\*
- Voltage variations may be noted due to normal production tolerances.\*

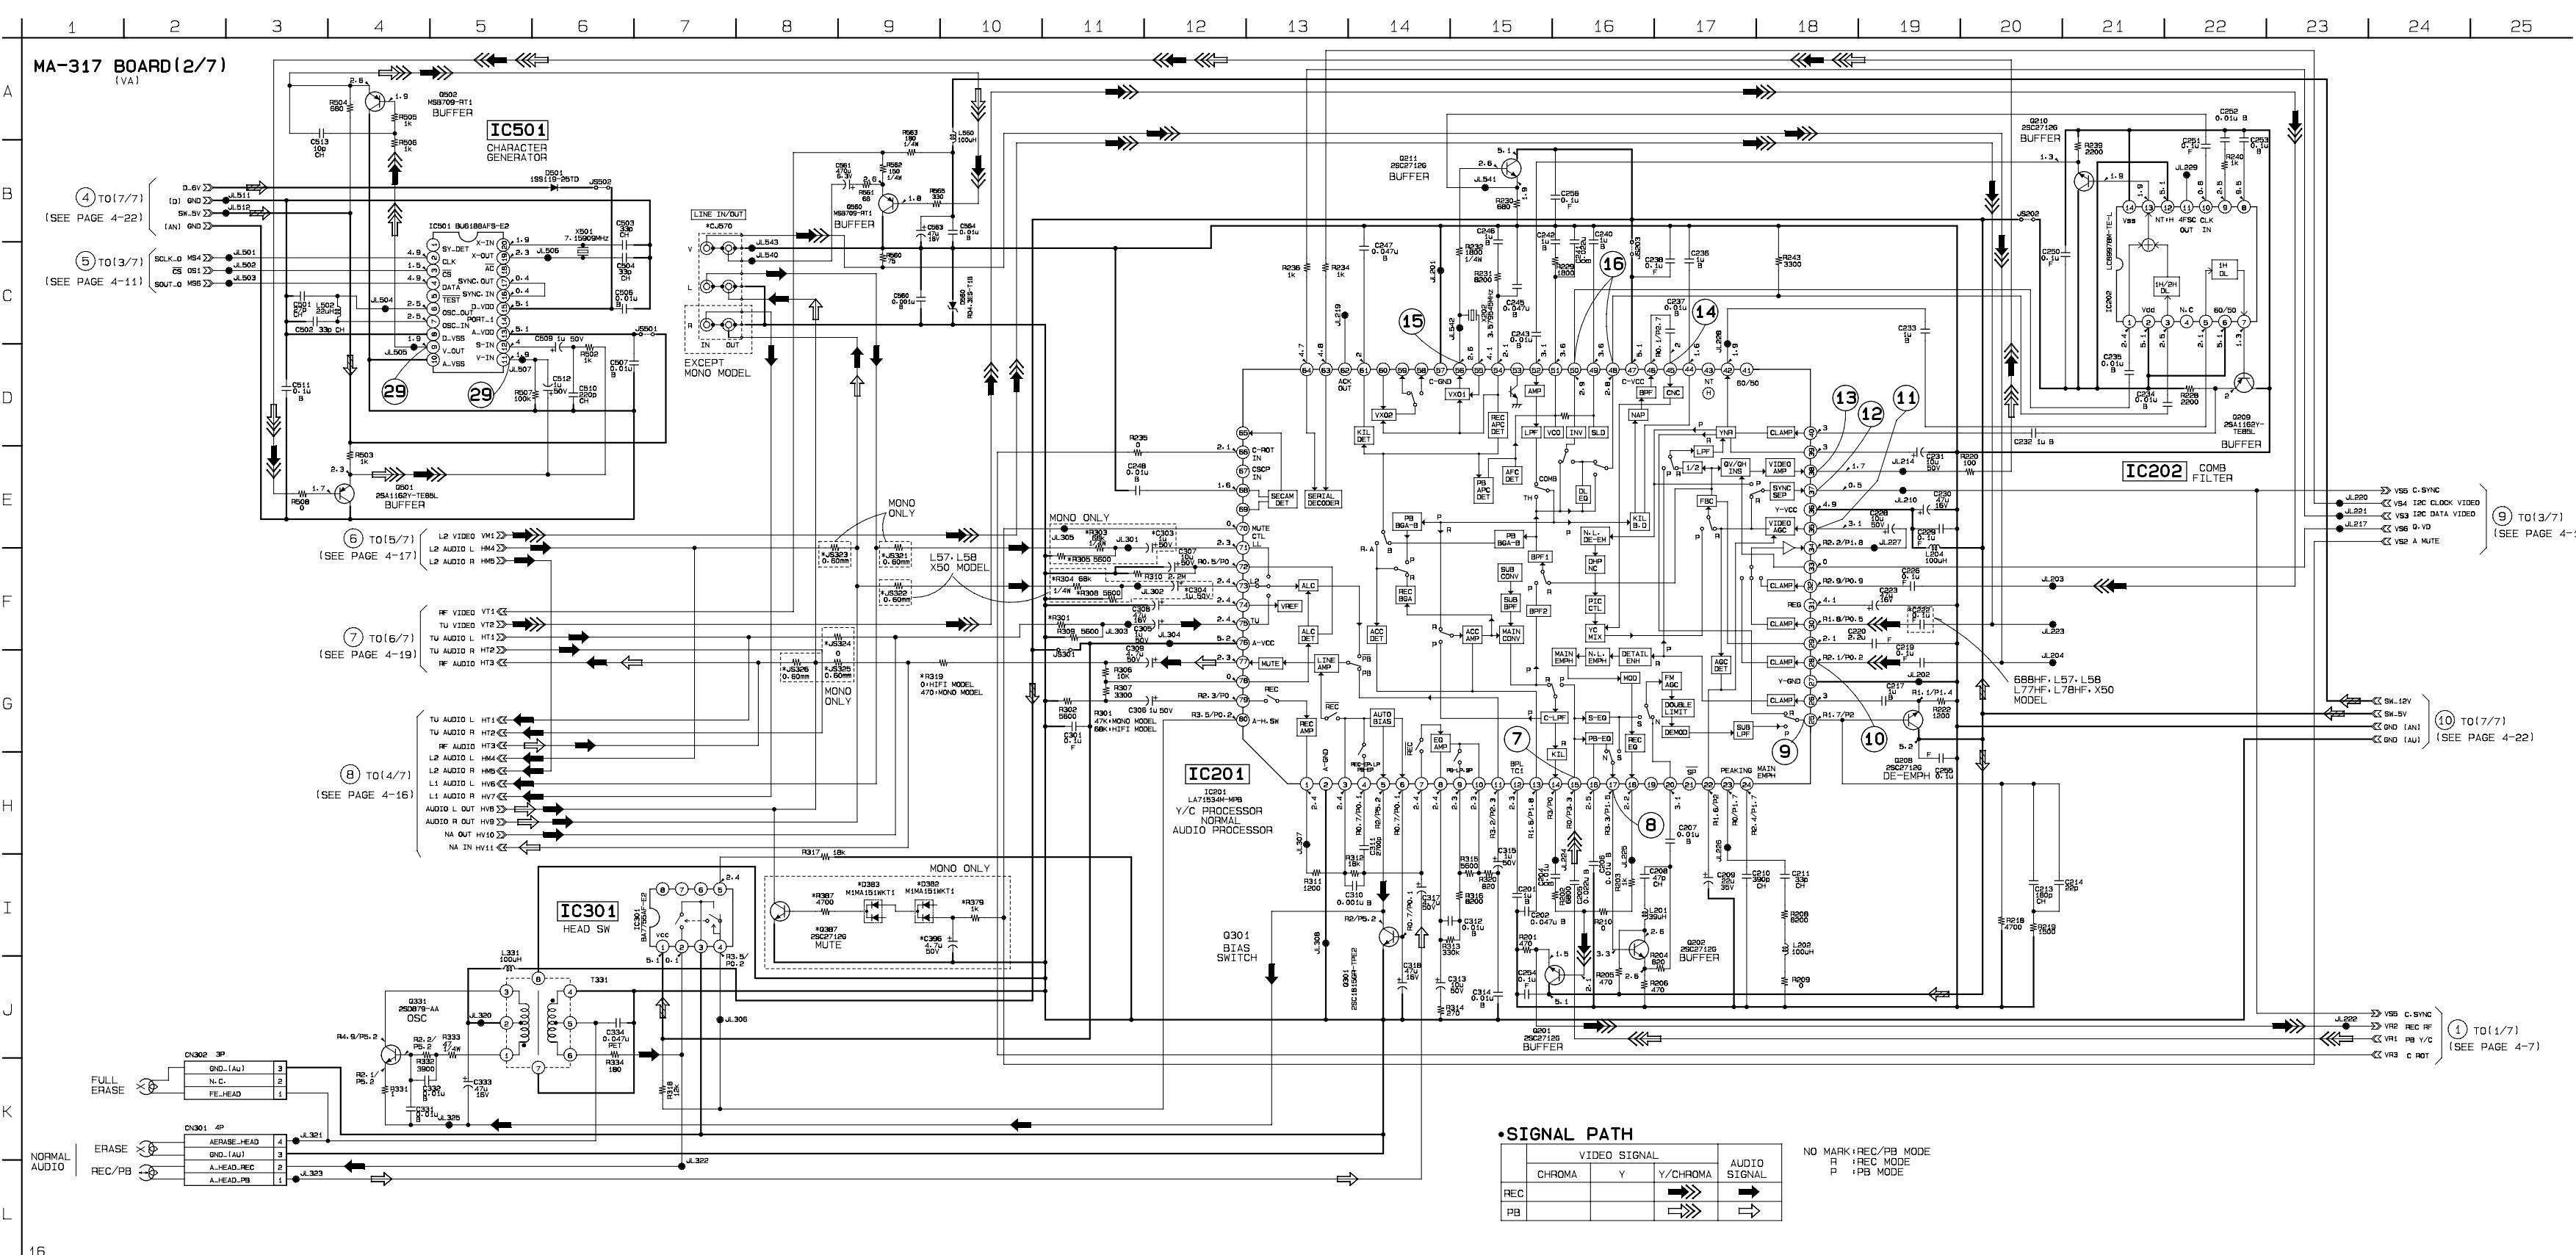

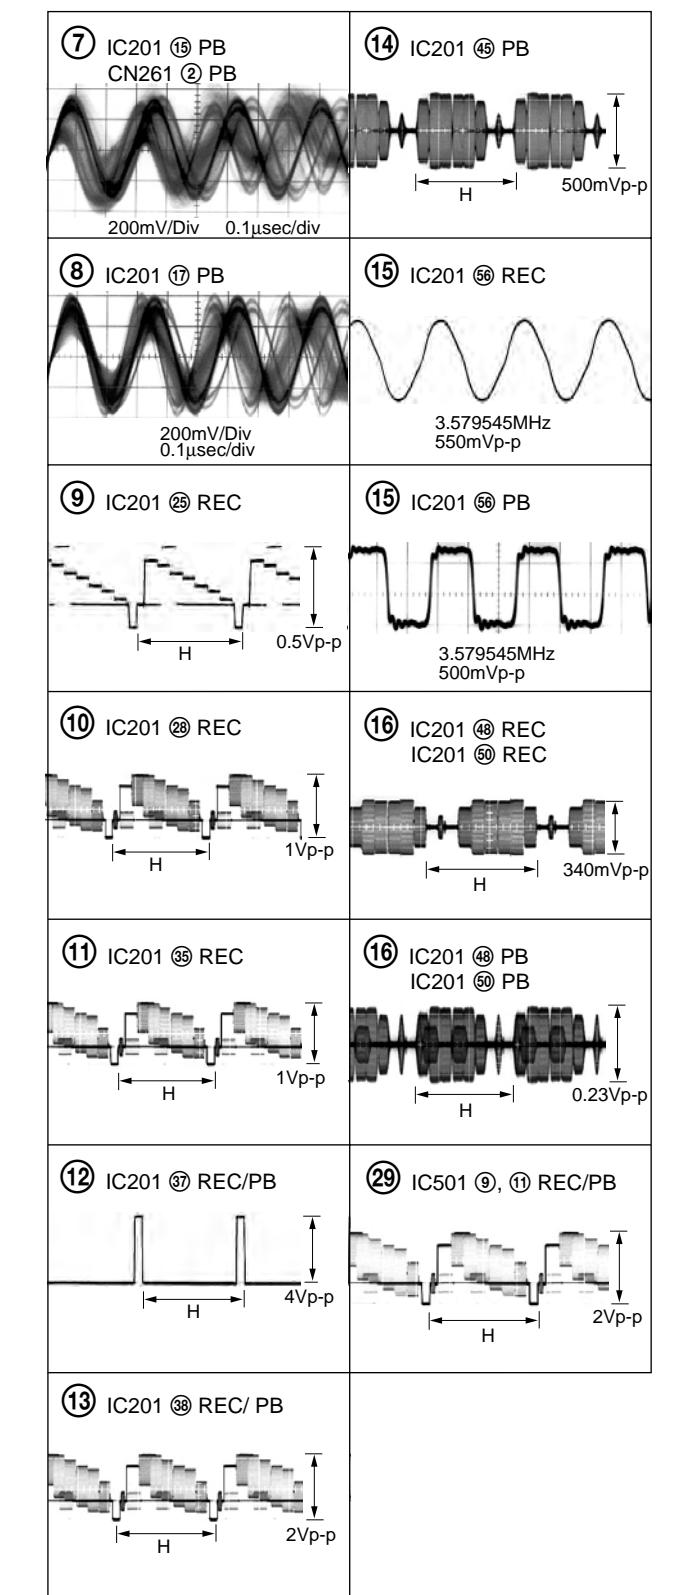

When indicating parts by reference number, please include the board name.

- \* : indicated by the color red.

48	AMUTE	O	Audio mute	98	AMP VCC	I	CTL amp
49	REC P	O	HiFi audio record control	99	AVCC	I	ANSV
50	REC	O	Audio record control 1: Playback	100	PULL DATA	O	Tuner PLL data

## SECTION 6 ADJUSTMENTS

### 6-1 MECHANICAL ADJUSTMENTS

For the mechanical adjustments, please refer to the "VHS MECHANICAL ADJUSTMENT MANUAL VI (S MECHANISM)" (9-921-647-11).

### 6-2. ELECTRICAL ADJUSTMENTS

**HiFi model:** SLV-677HF/678HF/688HF/L67HF/L68HF/  
L77HF/L78HF/X60HF

**Mono model:** SLV-478/L47/L48/L57/L58/X50

See the adjusting part location diagram from on page 6-8 for the adjustment.

#### 2-1. PREPARATION BEFORE ADJUSTMENT

##### 2-1-1. Equipment Required

The measuring instruments used for this alignment include:

- 1) Monitor TV
- 2) Oscilloscope, dual-trace, bandwidth of 30MHz or more, with delay mode (A probe 10:1 should be used unless otherwise specified.)
- 3) Frequency counter
- 4) Pattern generator
- 5) Digital voltmeter
- 6) Audio generator
- 7) Audio level meter
- 8) Audio distortion meter
- 9) Audio attenuator
- 10) Alignment tapes

KRV-51N2

Part No.: 8-192-605-32

##### 2-1-2. Equipment Connection

Unless otherwise specified, connect and adjust the measuring instruments as shown in the following diagram.

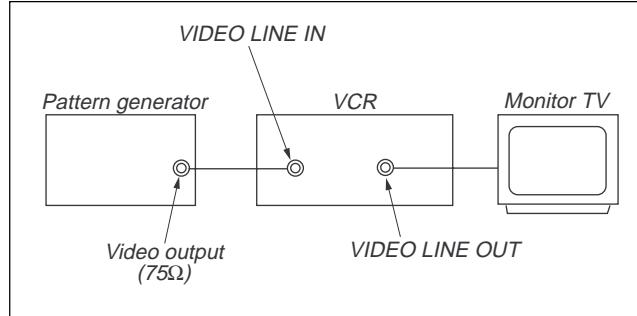

Fig. 6-2-1.

##### 2-1-3. Input Signal Check

Video signal produced by a pattern generator is used as an adjustment signal to perform electrical alignment for this unit. This video signal must satisfy the specification.

Unless otherwise specified, place the switches and controls of this unit in the following positions:

- **[INPUT SELECT]** switch ..... LINE or LINE 1  
(Remote commander)

Connect an oscilloscope to the Video Input terminal. Check that the synchronizing signal of the Y signal has an amplitude of approximately 0.7V and that the burst signal has an amplitude of approximately 0.3V and its waveform is flat. And check that the level ratio of burst signal to "red" signal is 0.30 : 0.66. The video signal (color bar) used for electrical aligning this unit is shown in Fig. 6-2-2.

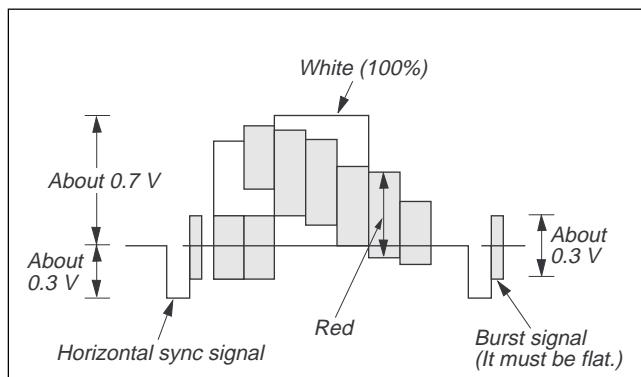

Fig. 6-2-2. Color Bar Signals of Pattern Generator

##### 2-1-4. Alignment Tape

- Contents of KRV-51N2

	Mode	Period	Video signal	Audio signal	
				Hi-Fi	Normal
1	SP	7 minutes	Color bar	400Hz	400Hz
2		3 minutes	Monoscope		
3	EP	7 minutes	Color bar		
4		3 minutes	Monoscope		

## 2-1-5. Input/Output Levels and Impedance

Video input: LINE IN  
Input signal: 1Vp-p, 75ohms, unbalanced,  
sync negative

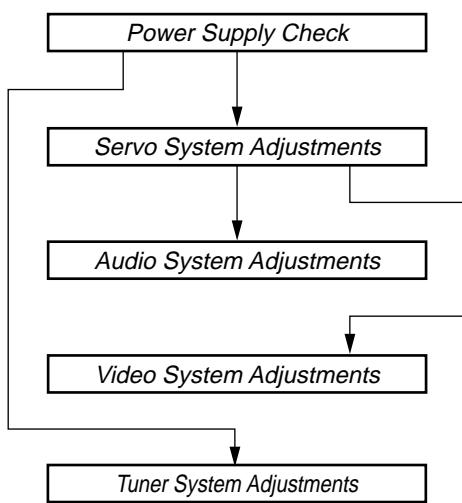

Video output: LINE OUT  
Output signal: 1Vp-p, 75ohms, unbalanced,  
sync negative

Audio input: LINE IN  
Input level: -7.5 dBs  
(0dBs= 0.775Vrms)  
Input impedance: more than 47 kilohms

Audio output: LINE OUT  
Standard level: -7.5dBs at load impedance 47  
kilohms  
Output impedance: less than 10 kilohms

## 2-1-6. Adjustment Sequence

The adjustments should be performed in the following sequence.

## 2-2. POWER SUPPLY CHECK

### 2-2-1. Output Voltage Check (MA-317 Board)

Mode	E-E
Measuring Instrument	Digital voltmeter
SW 12V Check	
Measurement point	IC601 pin ②
Specified value	12.0 ± 0.3V
MTR12V Check	
Measurement point	Q605 ④
Specified value	13.5 ± 1.0V
SW5V Check	
Measurement point	Q603 ⑤
Specified value	5.1 ± 0.3V

#### [Check Method]

- 1) Each of these supply voltages must meet its specified value.

## 2-3. SERVO SYSTEM CHECK

Unless otherwise specified, set the switches to the following positions.

- **PROGRAM** switch ..... LINE or LINE 1
- **INPUT SELECT** switch ..... LINE or LINE 1  
(Remote commander)
- **TAPE SPEED** switch ..... SP (Remote commander)

### 2-3-1. RF Switching Position/ AF Switching Position Adjustments (MA-317 Board)

#### [Adjustment Purpose]

To adjust the link of the A-ch and B-ch of the tape playback outputs. To make the unit compatible with other tapes and units. If this specification is not satisfied, the link will appear on the screen and the screen will be disrupted, etc.

Mode	Playback
Signal	Alignment tape: SP color bar portion
Measurement point	CH1: Video LINE OUT (RF switching position) CN341 pin ① (HF ADJ) (AF switching position) CH2: CN261 pin ③ (RF SWP)
Measuring instrument	Oscilloscope
Specified value	$6.5 \pm 0.5H$ ( $410 \pm 32 \mu\text{sec}$ )

#### [Adjustment Method]

- 1) Short-circuit between JS401 and ground for about 1 second to activate the RF switching position adjustment mode.
- 2) Check that "AP" is indicated on FL display.
- 3) Using the channel + and - buttons, adjust to  $410 \pm 32 \mu\text{sec}$  ( $6.5 \pm 0.5H$ ).
- 4) Press the PAUSE button. (Adjustment is over for mono models.)
- 5) The set goes to the AF switching position adjustment mode.

- 6) Check that "AH" is indicated on FL display.
- 7) Using the channel + and - buttons, minimize a chipped portion. At this time, confirm that a noisy sound is not heard.
- 8) Press the PAUSE button.
- 9) Check that "AH" indication is disappeared. When it is not disappeared, repeat from the item 1).
- 10) Press the STOP button.
- 11) Press the EJECT button.

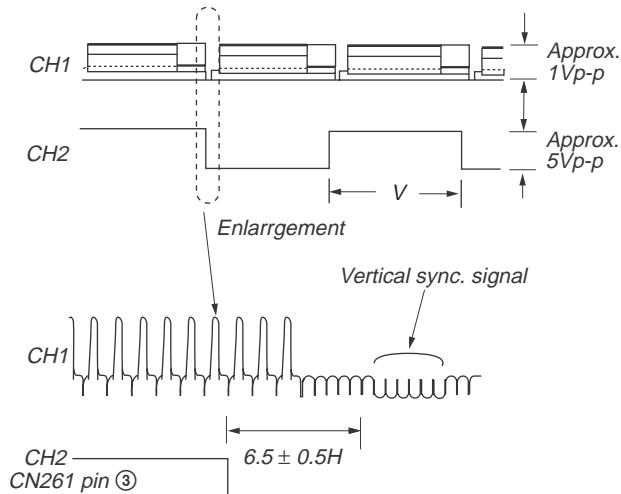

Fig. 6-2-3.

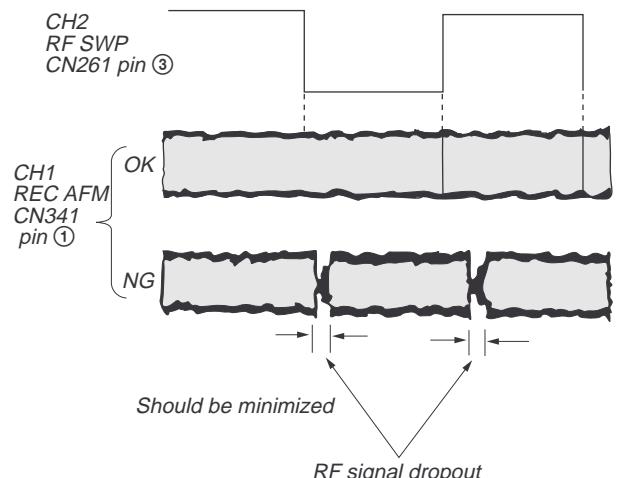

Fig. 6-2-4.

## 2-4. VIDEO SYSTEM CHECKS AND ADJUSTMENT

For the video system checks, follow the checking procedures given below as a rule. The color bar video signal supplied from the pattern generator is used as the video input signal for the video system adjustment of the recording mode. Check that the signal satisfies the specified value designated in the "Check of input signal" (Fig. 6-2-2)

Unless otherwise specified, set the switches to the following positions.

- **[INPUT SELECT]** switch ..... LINE or LINE 1  
(Remote commander)
- **[TAPE SPEED]** switch ..... SP (Remote commander)

### [Checking Sequence]

- 1) X'tal OSC Check
- 2) SYNC AGC Check
- 3) White clip/Dark clip Check
- 4) Recording Y Level Check
- 5) Recording Chroma Level Check
- 6) Playback Level Check
- 7) VCO frequency adjustment

## 2-4-1. X'tal OSC Check (MA-317 Board)

Mode	Playback
Signal	Alignment tape: SP Color bar portion
Measurement point	IC201 pin ⑥
Measuring instrument	Oscilloscope and Frequency counter
Specified value	$3,579,545 \pm 70\text{Hz}$

Note: A frequency counter should be connected through a buffer amplifier (oscilloscope, etc.) having a high impedance and a low capacitance.

### [Check Method]

- 1) Check that the oscillation frequency satisfies the specified value and that the oscillation voltage is  $500 \pm 200\text{mVp-p}$ .

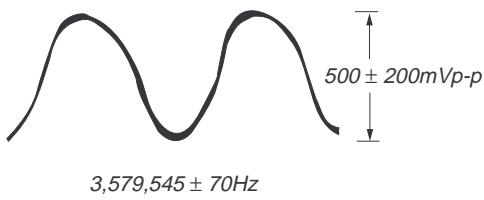

Fig. 6-2-5.

## 2-4-2. SYNC AGC Check (MA-317 Board)

Mode	E-E
Signal	Color bar
Measurement point	IC201 pin ⑧
Measuring instrument	Oscilloscope
Specified value	$A=2.10 \pm 0.14\text{Vp-p}$

### [Check Method]

- 1) Check that the Video signal level (A) satisfies the specified value.

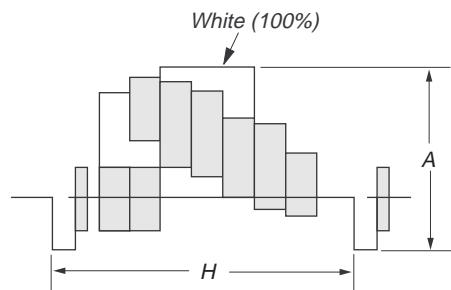

Fig. 6-2-6.

## 2-4-3. White Clip/Dark Clip Check (MA-317 Board)

Mode	E-E
Signal	Color bar
Measurement point	IC201 pin ⑦
Measuring instrument	Oscilloscope
Specified value	White clip : $190 \pm 10\%$ Dark clip : $58.5 \pm 5\%$

Connect a resistor of  $3.3\text{k}\Omega$  between IC201 pin ⑫ and GND.

### [Check Method]

- 1) Check that the white clip level is  $190 \pm 15\%$  to the white (100%) level.
- 2) Check that the dark chip level is  $50 \pm 10\%$  to the white (100%) level.

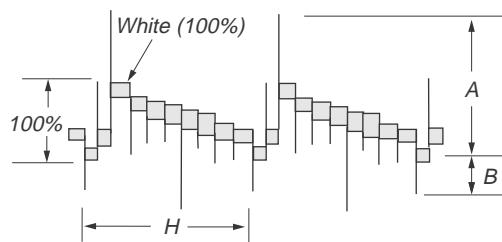

Fig. 6-2-7.

#### 2-4-4. Recording Y Level Check (MA-317 Board)

Mode	E-E
Signal	No-signal
Measurement point	IC201 pin ⑯
Measuring instrument	Oscilloscope
Specified value	$A=290 \pm 70\text{mVp-p}$

#### [Check Method]

- 1) Check that the recording RF signal satisfies the specified value.

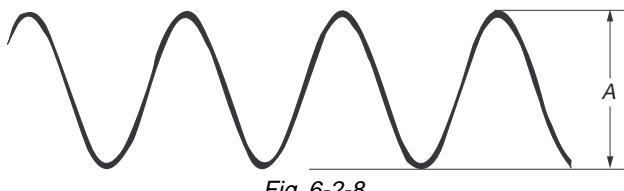

Fig. 6-2-8.

#### 2-4-5. Recording Chroma Level Check (MA-317 Board)

Mode	Recording
Signal	Color bar
Measurement point	IC201 pin ⑯
Measuring instrument	Oscilloscope
Specified value	$A=450 \pm 70\text{mVp-p}$

#### [Check Method]

- 1) Confirm the amplitude of recording chroma level becomes the specified value.

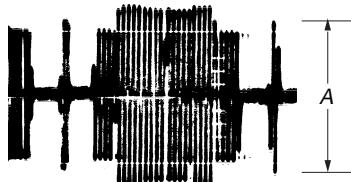

Fig. 6-2-9.

#### 2-4-6. Playback Level Check (MA-317 Board)

Mode	Playback
Signal Alignment	Alignment tape : SP mode color bar portion
Measurement point	Video LINE OUT terminal
Measuring instrument	Oscilloscope
Specified value	$A=1.0 \pm 0.1\text{Vp-p}$ ( $75\Omega$ terminated)

#### [Check Method]

- 1) Check that the playback level satisfies the specified value.

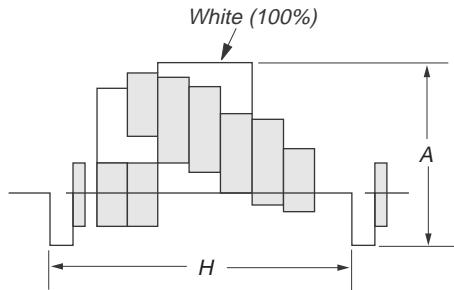

Fig. 6-2-10.

## 2-5. AUDIO SYSTEM ADJUSTMENT

- For the adjustment of the audio system, perform in the SP mode if there is no special notes. Use the alignment tape.

### [Connecting Instruments]

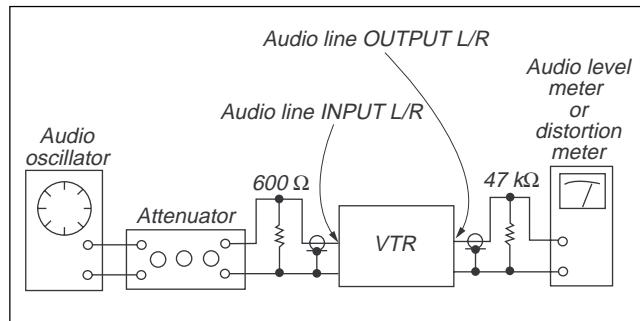

Fig. 6-2-12.

- Adjust in the SP mode if there is no special indications.
- Perform the adjustment setting the switch on the following positions.
- [INPUT SELECT] switch** ..... LINE or LINE 1  
(Remote commander)

### [Adjustment Method]

- ACE head adjustment....Refer to the VHS mechanical adjustment manual VI (S MECHANISM)(9-921-647-11).
- E-E output level check
- Overall Output level and distortion factor check
- Overall noise level check.

### 2-5-1. ACE Head Adjustment

Refer to the VHS mechanical adjustment manual VI (S MECHANISM)(9-921-647-11).

### 2-5-2. E-E Output Level Check

Mode	E-E
Signal	400Hz, -7.5dBs : CJ570
Measurement point	CJ570
Measuring instrument	Audio level meter
Specified value	-7.5 ± 2dBs

### [Check Method]

- Input signal of 400Hz and -7.5dBs to the CJ461 L/R.
- Check that the audio output level is -7.5 ± 3dBs.

### 2-5-3. Overall Output Level and Distortion Factor Check

Mode	Self-record playback
Signal	400Hz, -7.5dBs : CJ570
Measurement point	CJ570
Measuring instrument	Audio level meter and Distortion meter
Specified value	Playback Level: -7.5 ± 3dBs Distortion: 4.0% or less

### [Check Method]

- Input signal of 400Hz and -7.5dBs to the audio input.
- Record signal.
- Playback the recorded portion.
- Check that the output level is -7.5 ± 3dBs.
- Check that the distortion factor is 4.0% or less.

### 2-5-4. Overall Noise Level Check

Mode	Self-record playback
Signal	No signal (Insert a shorting plug into the Audio LINE IN terminal)
Measurement point	CJ570
Measuring instrument	Audio level meter
Specified value	-45.5dBs or less

### [Check Method]

- Record.
- Playback recorded portion.
- Check that noise level is -45.5dBs or less.

## 2-6. TUNER SYSTEM ADJUSTMENT (HiFi MODEL)

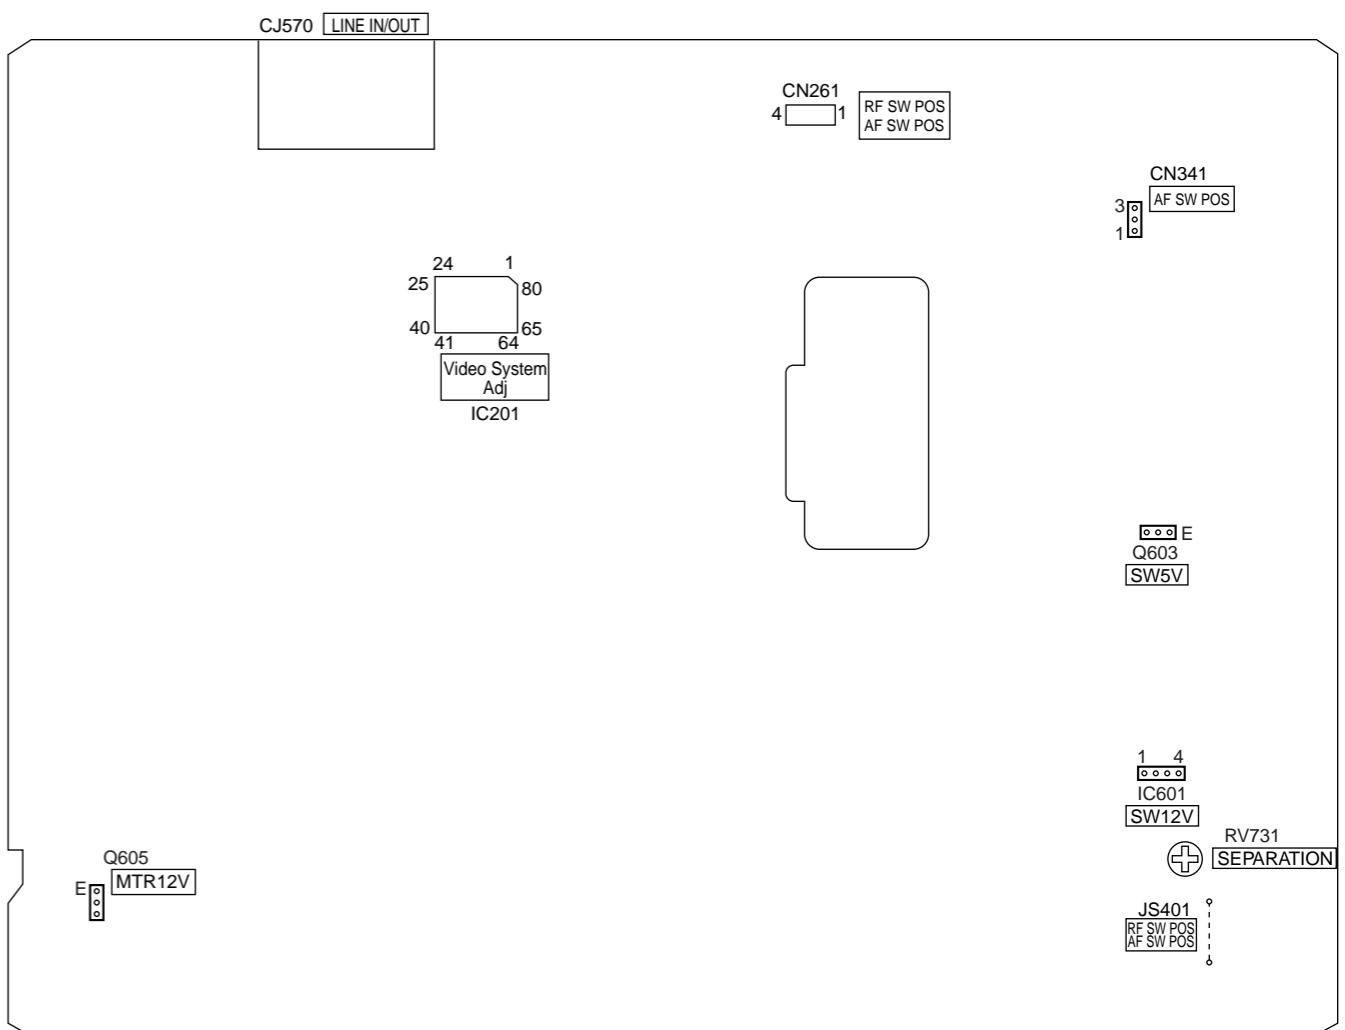

### 2-6-1. Separation Adjustment (MA-317 Board)

Mode	E-E
Signal	RF signal Video : Color bar white (100%) modulation Audio : L: 400Hz, R: 2kHz 30% modulation Electrical field: 60-80dBm/75Ω terminated
Measuring instrument	Audio level meter
Measuring point	LINE OUT L
Adjusting element	RV731
Specified value	2kHz component minimum

### [Adjustment Method]

- Connect an audio level meter to LINE OUT L channel via HPF.
- Feed the RF signal from RF IN terminal.
- Adjust with RV731 so that the output level satisfies the specified value.

**2-7. ADJUSTING PARTS LOCATION DIAGRAM**  
MA-317 BOARD (CONDUCTOR SIDE)

## SECTION 7 REPAIR PARTS LIST

### 7-1. EXPLODED VIEWS

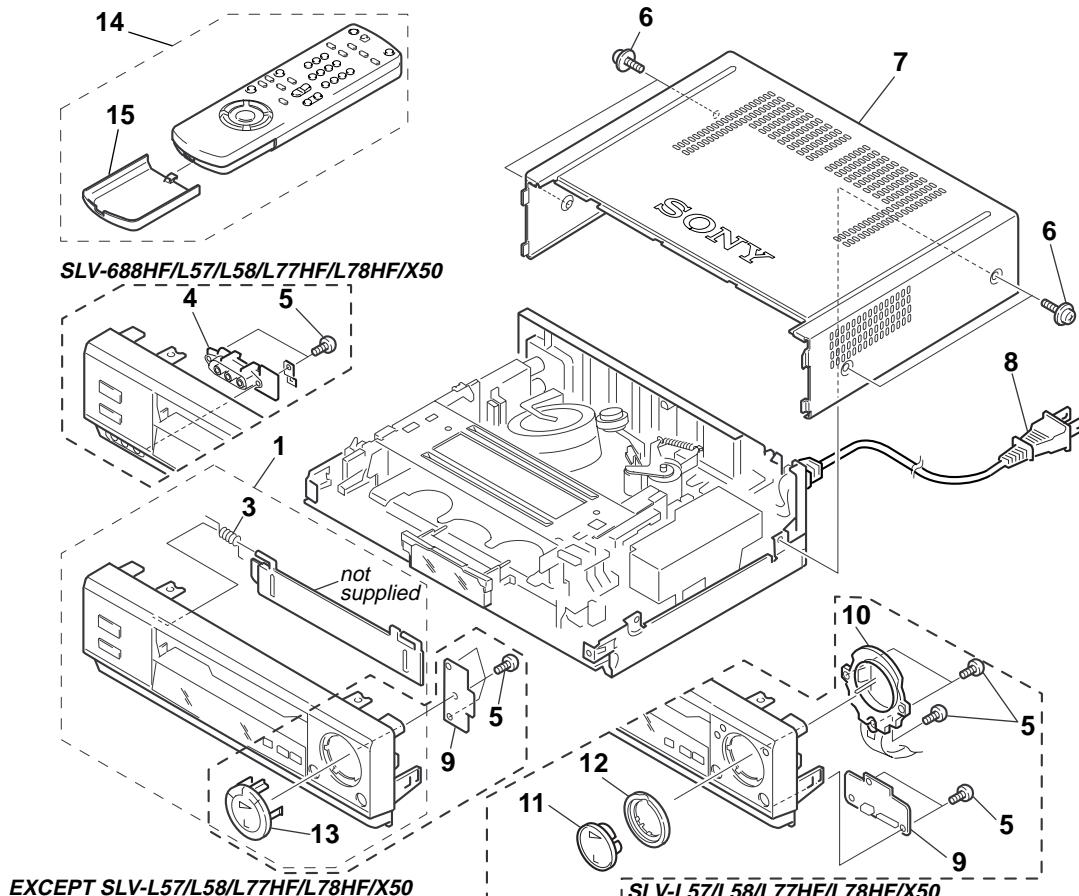

**Note:**

- XX, -X mean standardized parts, so they may have some differences from the original one.
- Items marked "\*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- The mechanical parts with no reference number in the exploded views are not supplied.
- Hardware (#mark) list is given in the last of this parts list.

The components identified by mark  $\triangle$  or dotted line with mark  $\triangle$  are critical for safety. Replace only with part number specified.

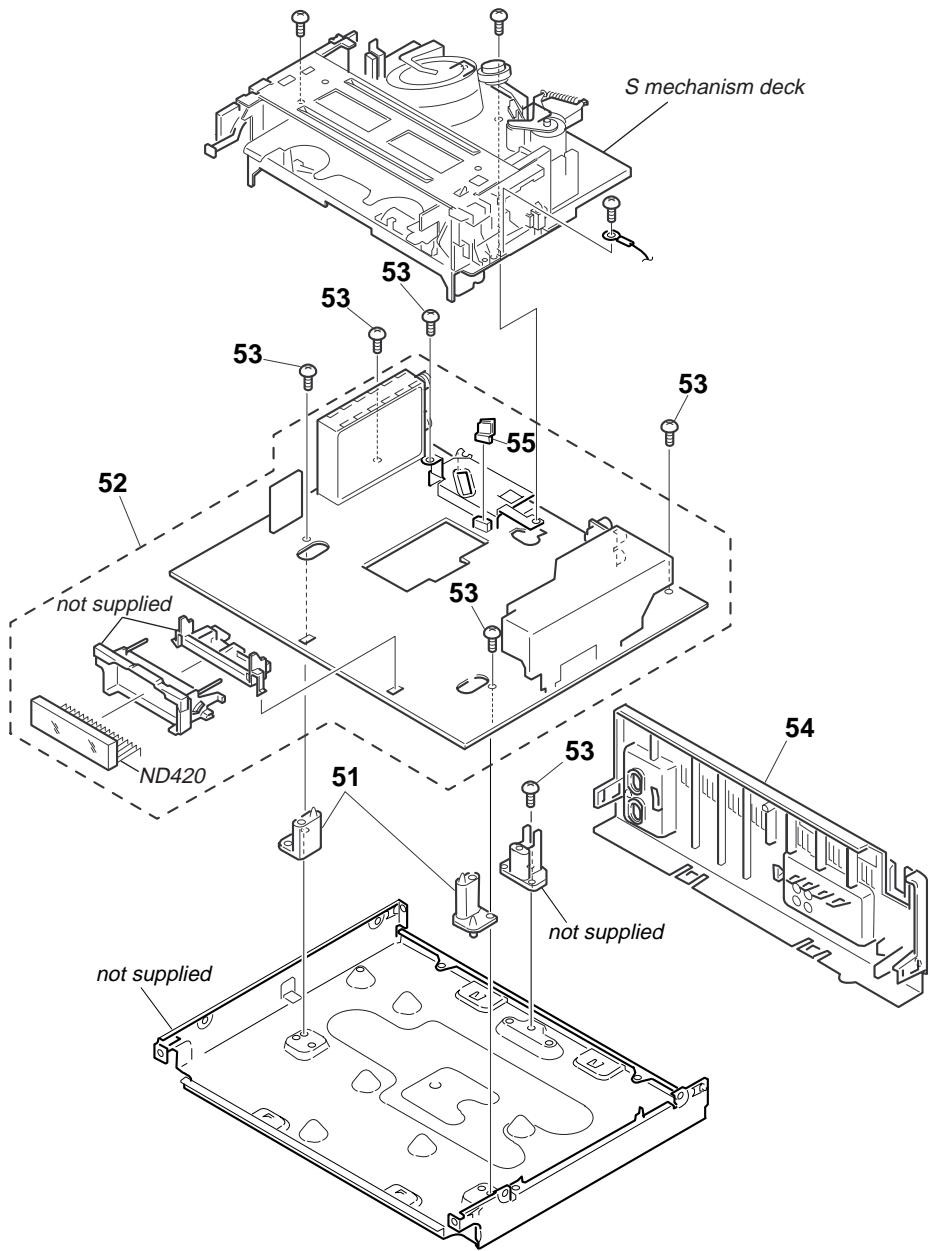

Les composants identifiés par une marque  $\triangle$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

## 7-2. ELECTRICAL PARTS LIST

### Note:

When indicating parts by reference number, please include the board name.

The components identified by mark  $\triangle$  or dotted line with mark  $\triangle$  are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque  $\triangle$  sont critiques pour la sécurité.

Ne les remplacer que par une pièce portant le numéro spécifié.

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX, -X mean standardized parts, so they may have some difference from the original one.
- Items marked “\*” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- CAPACITORS:  
uF:  $\mu$ F
- RESISTORS  
All resistors are in ohms.  
METAL: metal-film resistor  
METAL OXIDE: Metal Oxide-film resistor  
F: nonflammable
- COILS  
uH:  $\mu$ H
- SEMICONDUCTORS  
In each case, u:  $\mu$ , for example:  
uA...:  $\mu$ A..., uPA...,  $\mu$ PA...,  
uPB...:  $\mu$ PB..., uPC...,  $\mu$ PC...,  
uPD...,  $\mu$ PD...
